Fire Service Inspectorate, 2007-03-07 Incidents involving rescue from road vehicles are dramatically increasing in frequency There are some 3500 deaths on the road each year with 35 000 serious injuries Modern motor vehicles are becoming safer for occupants due to advancement in technology so persons are more likely to survive high impact speeds but are also more likely to become entrapped The Fire and Rescue Service as the primary rescue service requires national guidance to ensure a similar standard of response anywhere in the UK This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care Each chapter forms an independent reference source but the publication as a whole forms a complete guide Chapters cover vehicle design and construction dealing with incidents safety procedures operational procedures extrication equipment medical considerations and trauma care Integrated Personal Development System I P D S Appendices cover Highways Agency Fire and Rescue Service memorandum of understanding training and general information and emergency services personnel ESP aide m moire The CD ROM Vehicle extrication techniques is a multi media guide to rescue tool handling and extrication techniques **Pre-hospital Obstetric Emergency Training** Advanced Life Support Group (ALSG), 2009-10-30 The Pre hospital Obstetric Emergency Training POET programme provides an introduction to the obstetric patient and the anatomical and physiological changes that occur during pregnancy including interpretation of patient held records and rapid assessment of the obstetric patient It includes clear definitions and describes risk factors diagnosis and pre hospital management of significant problems that occur in both

early and late pregnancy and the immediate postnatal period. These are all situations that the pre-hospital practitioner may attend. This text and the accompanying integrated on-line and hands-on course will help practitioners identify and manage a range of time-critical obstetric emergencies specifically in the pre-hospital setting and provides a structured examination and assessment technique as an aid to determining what treatment should be provided before transport as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance staff, doctors and nurses working in the emergency pre-hospital setting and to midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available.
