AS AMERICA and the world grapple with the consequences of global environmental change, writer and activist Bill McKibben offers this unprecedented, inspiring, and timely anthology gathering the best and most significant American environmental writing from the last two centuries. "Each advance in environmental practice" in our nation's history, McKibben observes in his introduction, "was preceded by a great book." Here, for the first time in a single volume, are the words that made a movement.

Classics of the environmental imagination—the essays of Henry David Thoreau, John Muir, and John Burroughs; Aldo Leopold's *A Sand County Almanac*; Rachel Carson's *Silent Spring*—are set alongside an emerging activist movement, revealed by newly uncovered reports of pioneering campaigns for conservation, passages from landmark legal opinions and legislation, and soaring protest speeches. Ethics of Alaska Travel Writing since 1959 Benjamin Ferguson,2025-08-28 This book digs into environmental themes in Alaska travel writing since U S statehood in 1959 drawing on the works of six authors including Barry Lopez Jonathan Raban Tom Lowenstein and others Each work though disparate in style advocates for the empowerment of the Alaska Native people by connecting not only with diverse perspectives but with the lived realities in the geographical spaces that have formed them In analyzing how these authors have succeeded in depicting the realities of alterities and where they have perhaps fallen short by more recent standards we may begin to carve out a system of ethics This is important as fresh waves of travel writers search for their own place in the environmental conversations surrounding the ever evolving 21st century Arctic and its place on the front lines of a changing climate

Utilitarianism as a Way of Life Bart Schultz,2024-08-20 Utilitarianism a commitment to the greatest happiness for the greatest number has been the target of endless opposition According to its critics it ignores the separateness of persons cannot secure the protections of basic rights demands extreme sacrifice can justify anything the list goes on It has been implicated in the horrors of settler colonialism imperialism and racial capitalism both historically and today as the neoliberal world order faces a profound legitimation crisis Bart Schultz argues that utilitarian philosophy must be decolonized and reimagined for the current moment a time of new and looming existential threats in a world desperate for social change Where dominant ethical and political approaches have failed to adequately deal with the enormous challenges we face utilitarianism as a set of lived practices not simply a theoretical construction may hold out some hope of seriously addressing them Drawing on alternatives to the well known Eurocentric story of utilitarianism and an extensive review and critique of that story and incorporating the works of Peter Singer Katarzyna de Lazari Radek Derek Parfit Martha Nussbaum and other major philosophers Schultz crafts a groundbreaking new framework of utilitarianism born of struggle and resistance Utilitarianism as a Way of Life is an essential text for scholars and students of philosophy political science economics decolonization studies gender studies psychology environmental studies and related fields

The Ecology of Modernism Joshua Schuster,2015-10-15 The Ecology of Modernism explores the unexpected absence of

an environmental ethic in American modernist and avant garde poetics given its keen concern with an environmental aesthetic and explains why American modernism was never green Examining the relationships of key modernist writers poets and musicians to nature industrial development and pollution Joshua Schuster posits that the curious failure of modernist poets to develop an environmental ethic was a deliberate choice and not an inadvertent omission **Energizing**

Neoliberalism Caleb Wellum,2023-10-17 How the 1970s energy crisis facilitated a neoliberal shift in US political culture In **Energizing Neoliberalism** Caleb Wellum offers a provocative account of how the 1970s energy crisis helped to recreate postwar America Rather than think of the crisis as the obvious outcome of the decade s oil shocks Wellum unpacks the cultural construction of a crisis of energy across different sectors of society from presidents policy experts and environmentalists to filmmakers economists and oil futures traders He shows how the dominant meanings ascribed to the 1970s energy crisis helped to energize neoliberal visions of renewed abundance and power through free market values and approaches to energy Deeply researched in federal archives expert discourse and popular culture **Energizing Neoliberalism** demonstrates the central role that energy crisis narratives played in America s neoliberal turn Wellum traces the roots of the crisis to the consumption practices and cultural narratives spawned by the petrocultural politics of Cold War capitalism In a series of illuminating case studies including 1970s energy conservation debates popular car films and the creation of oil futures trading Wellum chronicles the consolidation of a neoliberal capitalist order in the United States through an energy politics marked by anxious futurity petro populist sentiment and financialized energy markets He shows how experiences of energy shortages and fears of future energy crises unsettled American national identity and power yet also informed Reagan era confidence in free markets and US global leadership In taking a cultural approach to the 1970s energy crisis Wellum offers a challenging meditation on the status of crisis in modern history contemporary life and critical thought and how we rely on crises to make sense of the world **Vegetarianism and Veganism in Literature from the Ancients to the**

Twenty-First Century Theophilus Savvas,2024-05-31 **Vegetarianism and Veganism in Literature from the Ancients to the Twenty First Century** reassesses both canonical and lesser well known literary texts to illuminate how vegetarianism and veganism can be understood as literary phenomena as well as dietary and cultural practises It offers a broad historical span ranging from ancient thinkers and writers such as Pythagoras and Ovid to contemporary novelists including Ruth L Ozeki and Jonathan Franzen The expansive historical scope is complemented by a cross cultural focus which emphasises that the philosophy behind these diets has developed through a dialogic relationship between east and west The book demonstrates also the way in which carnivorousism has functioned as an ideology one which has underpinned actions harmful to both human and non human animals **From the Tourist's Gaze** Pietro Agnoletto,2025-06-27 **From the Tourist's Gaze** bridges environmental humanities and amateur cinema studies exploring tourism induced environmental issues through the visual representations created by tourists themselves The protagonists of the book are families from North West Italy and their

holiday films captured during their holidays in the Ligurian Riviera The timeframe spans between the 1950s and 1970s the so called Italian economic miracle a period in which Italy experienced an extraordinary and rapid economic growth and consequentially a rise in living standards including tourism and film cameras accessibility Radical environmental transformations such as the industrialization and cementing of spaces or the conversion of entire coastlines into territories equipped to receive masses of tourists were just one of the consequences studied from a myriad of sources but never through amateur films The most illustrative case is the Ligurian Riviera which has been regarded as an example of land consumption since those contemporary years Despite being centered on a specific case study readers will be equipped with practical tools to enhance their study of historical amateur films These tools are introduced through innovative methodological approaches to archival research and visual analysis The results will highlight the visual imagery of mid 20th century tourists and their perspectives on the destinations they visited offering fresh visually oriented insights that contribute to the field of tourism studies As a visual journey through mid 20th century Italian tourism and its environmental narratives it may interest cultural geographers tourism and media scholars and the broader group of environmental humanists the latter will have the opportunity to explore amateur cinema as an untapped resource for understanding cultural narratives while amateur cinema scholars will have an example of a fresh and different approach to their subject It can also give new insights to archivists specialized in home movies and be appealing to scholars and intellectuals interested in these topics **Teaching**

Sustainability / Teaching Sustainably Kirsten Allen Bartels, Kelly A. Parker, 2023-07-03 Over the coming decades every academic discipline will have to respond to the paradigm of more sustainable life practices because students will be living in a world challenged by competition for resources and climate change and will demand that every academic discipline demonstrate substantial and corresponding relevance This book takes as its point of departure that integrating a component of sustainability into a discipline specific course arises from an educator asking a simple question in the coming decades as humanity faces unprecedented challenges what can my discipline or area of research contribute toward a better understanding of these issues The discipline need not be future oriented an archaeologist for instance could incorporate into a course some aspects of sustainable archaeological practices in areas threatened by rapid climate change as well as examples of sustainable or unsustainable ways of living practiced by members of the long gone society under investigation This book also argues that courses about sustainability need to cross disciplinary boundaries both because of the inter relatedness of the issues and because students will require the ability to use interdisciplinary approaches to thrive through the multiple careers most of them will face The contributions to this book are presented under four sections Sustainability as a Core Value in Education considers the rationale for incorporating sustainability in disciplinary courses Teaching Sustainability in the Academic Disciplines presents eight examples of courses from disciplines as varied as agriculture composition engineering and teacher education Education as a Sustainable Practice reviews how the physical environment of

the classroom and the delivery of instruction need themselves to reflect the values being taught The final section addresses the issues of leadership and long term institutional change needed to embed sustainable practice as a core value on campus
