The Added Value of Auditing in a Non-Mandatory Environment Hans Duits, 2025-10-01 What is the raison d'être of auditing Does auditing only exist by the grace of the legislator Or does auditing fulfill other needs in contemporary society For many companies auditing has been made mandatory This is possibly one of the reasons why researchers to date have given limited attention regarding the drivers for the demand for audit Auditing seen as a social control mechanism is part of an organizational order in society Therefore it is essential to reflect on the changing demands of society As a lack of insight why society demands an audit accommodates the risk of not meeting the needs and expectations of society the added value of auditing may be called into question This dissertation deals with the question what are drivers for the demand for audit for Dutch SME companies which are not mandatory required to have their financial statements audited **CUET-PG**

A Primer to Causal Reasoning About a Complex World Lars-Göran Johansson, Thomas Banitz, Volker Grimm, Tilman Hertz, Emilie Lindkvist, Rodrigo Martínez Peña, Sonja Radosavljevic, Petri Ylikoski, Maja Schlüter, 2024-06-22 This open access book is about causal thinking and the use of causal language with a focus on introducing philosophical ideas about causation to students and researchers of Social Ecological Systems SES It takes a systematic approach to three central topics the meanings of different causal expressions sufficiency of evidence for inferences from observations to causal relations and how to handle the complexity of causal relations in social ecological systems Consequently the book is divided into three parts In the first part the authors analyse and discuss the use of causal idiom in ordinary language and in the second part they scrutinise the use of causal concepts and causal inference in science Finally the authors discuss causal reasoning about social ecological systems in multi and interdisciplinary contexts This book provides an analysis of the concept of causation useful in the empirical sciences where causal notions and idioms often are used without sufficient reflection Empirical sciences often use causal idiom drawn from ordinary language and similarly there is little formalisation of causal language and technical concepts in the humanities and social sciences This book is a valuable resource for the application of current philosophical discussions about the concept of causation in particular when applied to the analysis of social ecological systems but also when applied to research in the sciences and humanities
