TEST INSTRUCTIONS

- Please read all the following information before performing the test

- Do not freeze
- Keep out of the reach of children
- For in vitro diagnostic use, not to be taken internally

TEST PROCEDURE

1. Collect your urine in a clean dry container cup. Only a small amount is needed.
2. Remove the test device from the foil pouch.
3. Hold the dropper vertically and transfer 3 full drops of urine to the sample well marked **S** on the test device, then begin timing.
4. Test results will appear within 3 minutes. Positive results may appear as early as 60 seconds.
5. Do not read the result after 10 min as this result may be invalid.

TEST RESULTS

Pregnant Result: The presence of two red lines in the Result Window means you are probably pregnant (The line in the upper region of the window is the control line, and the line in the lower region is the test line). The intensity of the lines may vary, they do not have to match.

NOT Pregnant Result: The presence of only one red line appearing in the upper (Control) region of the Result Window means you are probably not pregnant.

Invalid Result: If no red line appears in the upper (Control) region of the Result Window after 3-4 minutes, the result is invalid and you should repeat the test with another DG Health One Step Pregnancy Test.

QUESTIONS AND ANSWERS

1. **What should I do if I get a positive result?** A positive result means that you are probably pregnant. See your doctor to confirm you are pregnant.
2. **What should I do if I get a negative result?** A negative result means that no hCG has been detected in your urine, and you are probably not pregnant. If you do not start your period within a week after its due date, repeat the test with a new device. If you still get a negative result then see your doctor.
3. **Which factors may affect the test result?** Although the test is highly accurate in detecting pregnancy, a low incidence of false results (positive when no pregnancy exists or negative when pregnancy is present) can occur. Ectopic Pregnancy can give a false negative result. Drugs which contain hCG can give a false positive result. Alcohol, oral contraceptives, painkillers, antibiotics or hormone therapies that do not contain hCG should not affect the test result.

NOTE: Check with your doctor if you get unexpected or inconsistent test results.
