Pharmaceutical Chemistry of Natural Products V.

Alagarsamy, 2012-09-19

Salient Features:

- Logical and concise presentation of content as per the needs of the students
- Incorporation of all chemical and pharmaceutical aspects of the natural products
- Systematic and consistent organization of chapters
- Overview nomenclature
- Classification
- Qualitative chemical tests and general physical and chemical properties
- Detailed discussion on pharmaceutically important natural products with the source, pharmacological properties and uses along with their general properties
- Interesting and user friendly presentation of pharmacological action to help the students quickly recapitulate the action of the drug
- Simplified presentation of structural elucidation along with structures of compounds which helps to reproduce well in examinations
- Structure-activity relationship (SAR) of some important groups of natural products e.g. estrogens, progesterones, penicillins etc.
- Comprehensive coverage of syllabi of all the major Indian universities

EJEL Volume 10 Issue 2 , 30th Scientific-Experts Conference of Agriculture and Food Industry Muhamed Brka, Enisa Omanović-Miklićanin, Lutvija Karić, Vedad Falan, Almir Toroman, 2020-02-03

This book gathers the proceedings of the 30th Scientific Experts Conference of Agriculture and Food Industry held on September 26-27, 2019 in Sarajevo, Bosnia and Herzegovina. It reports on the application of innovative technologies in food sciences and agriculture and covers research in plant and animal production, agricultural economics and food production. Further, the book discusses key social and environmental issues and proposes answers to current challenges. The conference was jointly organized by the Faculty of Agriculture and Food Sciences of the University of Sarajevo, Bosnia and Herzegovina; the Faculty of Agriculture of Ege University, Turkey; the Bosnia and Herzegovina Medical and Biological Engineering Society; and the Faculty of Agriculture of the University of Belgrade, Serbia. The proceedings offer a timely snapshot of cutting-edge multidisciplinary research and developments in modern agriculture. As such, they address the needs of researchers and professionals, agricultural companies, food producers, and regulatory and food safety agencies.

ever heavier elements and neutron richer isotopes Extending nuclear physics to systems that are many times denser than even the core of an atomic nucleus one enters the realm of the physics of neutron stars and possibly quark stars a topic that is intensively investigated with many ground based and outer space research missions as well as numerous theoretical works By colliding two nuclei at very high ultra relativistic energies one can create a fireball of extremely hot matter reminiscent of the universe very shortly after the big bang leading to a phase of melted hadrons and free quarks and gluons the so called quark gluon plasma These studies tie up with effects of crucial importance in other fields During the collision of heavy ions electric fields of extreme strength are produced potentially destabilizing the vacuum of the atomic physics system subsequently leading to the decay of the vacuum state and the emission of positrons In neutron stars the ultra dense matter might support extremely high magnetic fields far beyond anything that can be produced in the laboratory significantly affecting the stellar properties At very high densities general relativity predicts the stellar collapse to a black hole However a number of current theoretical activities modifying Einstein s theory point to possible alternative scenarios where this collapse might be avoided These and related topics are addressed in this book in a series of highly readable chapters In addition the book includes fundamental analyses of the practicalities involved in transiting to an electricity supply mainly based on renewable energies investigating this scenario less from an engineering and more from a physics point of view While the topics comprise a large scope of activities the contributions also show an extensive overlap in the methodology and in the analytical and numerical tools involved in tackling these diverse research fields that are the forefront of modern science

Systems Biology for Traditional Chinese Medicine Guoan Luo, Yiming Wang, Qionglin Liang, Qingfei Liu, 2012-07-03

The application of systems biology methods to Traditional Chinese Medicine Emphasizing the harmony of the human body with the environment Traditional Chinese Medicine TCM has evolved over thousands of years It is a systemic theory derived from clinical experience the philosophy of holism and systematology and the belief that man is an integral part of nature Systems Biology for Traditional Chinese Medicine describes how the latest methods in systems biology can be applied to TCM providing a comprehensive resource for the modernization and advancement of TCM as well as general drug discovery efforts It is the first comprehensive work to propose a system to system research methodology to study the interaction between TCM and the human body and its applications in drug research and development Using three popular traditional Chinese medicines Shuanglongfang Qingkailing and Liushenwan as examples the authors set forth case examples demonstrating how to find material groups perform efficacy screenings and conduct safety evaluations of TCM The book also Describes the mechanisms of TCM at the molecular and systems levels using chemomics genomics proteomics metabolomics and bioinformatics Places modern scientific technologies within the context of TCM helping drug researchers improve experimental designs and strategies Illustrates how a systems biology approach is compatible with TCM s traditional holistic therapeutic strategies and treatment modalities Presents topics of current interest such as integrated global systems biology

and the application of chemometrics research to herbal medicines This book not only opens a new pathway for the continued development of TCM but also for systems biology In addition it fosters collaboration and discussion among Eastern and Western scientists by applying systems biology to TCM
