

The Stickleback Fish - A Story of Modern Evolution

Sticklebacks are a small fish commonly found in freshwater. To understand this species better, scientists compared them to related species and discovered that sticklebacks that lived in freshwater had more armor than those that lived in the ocean. This is because the armor is made of bony plates called osteichthys.

Background

One of the most important and interesting features of the stickleback is its armor. The armor is made of bony plates called osteichthys.
