Answers Of Agriculture P2014:

Regulating Genetically Modified Crops in View of Environmental Risks Ancui Liu, 2022-05-25 This book analyzes international and Chinese regulatory approaches addressing environmental risks that may be caused by GM crops and examines how China implements its international obligations in its policies and laws Using the legal doctrinal method the book discusses the precautionary principle and the public involvement principle as well as several legal measures at the international law level and in Chinese law It observes that legal principles and measures as provided for in China's GMO legal framework have generally implemented the international obligations regarding the prevention of environmental risks that may be caused by the cultivation of GM crops and related activities However the book argues that Chinese law lacks an explicit codification of the precautionary principle and the same is true with regard to public participation the regulatory framework lacks specific obligations It concludes that future research should focus on the application and enforcement of the relevant Chinese legislation and that it is also important to investigate how the environmental risks that may be caused by new techniques such as genome editing techniques could be prevented given the experience gained by regulating the cultivation of GM crops and related activities

With carbon farming agriculture ceases to be part of the climate problem and becomes a critical part of the solution This book is the toolkit for making the soil itself a sponge for carbon It s a powerful vision Bill McKibben The Carbon Farming Solution is a book we will look back upon decades from now and wonder why something so critically relevant could have been so overlooked until that time It describes the foundation of the future of civilization Paul Hawken In this groundbreaking book Eric Toensmeier argues that agriculture specifically the subset of practices known as carbon farming can and should be a linchpin of a global climate solutions platform Carbon farming is a suite of agricultural practices and crops that sequester carbon in the soil and in above ground biomass Combined with a massive reduction in fossil fuel emissions and in concert with adaptation strategies to our changing environment carbon farming has the potential to bring us back from the brink of disaster and return our atmosphere to the magic number of 350 parts per million of carbon dioxide Toensmeier s book is the first to bring together these powerful strategies in one place Includes in depth analysis of the available research Carbon farming can take many forms The simplest practices involve modifications to annual crop production Although many of these modifications have relatively low sequestration potential they are widely applicable and

easily adopted and thus have excellent potential to mitigate climate change if practiced on a global scale Likewise grazing systems such as silvopasture are easily replicable don t require significant changes to human diet and given the amount of agricultural land worldwide that is devoted to pasture can be important strategies in the carbon farming arsenal But by far agroforestry practices and perennial crops present the best opportunities for sequestration While many of these systems are challenging to establish and manage and would require us to change our diets to new and largely unfamiliar perennial crops they also offer huge potential that has been almost entirely ignored by climate crusaders Many of these carbon farming practices are already implemented globally on a scale of millions of hectares These are not minor or marginal efforts but win win solutions that provide food fodder and feedstocks while fostering community self reliance creating jobs protecting biodiversity and repairing degraded land all while sequestering carbon reducing emissions and ultimately contributing to a climate that will remain amenable to human civilization Just as importantly to a livable future these crops and practices can contribute to broader social goals such as women s empowerment food sovereignty and climate justice The Carbon Farming Solution is at its root a toolkit and the most complete collection of climate friendly crops and practices currently available With this toolkit farmers communities and governments large and small can successfully launch carbon farming projects with the most appropriate crops and practices to their climate locale and socioeconomic needs Toensmeier s ultimate goal is to place carbon farming firmly in the center of the climate solutions platform alongside clean solar and wind energy With The Carbon Farming Solution Toensmeier wants to change the discussion impact policy decisions and steer mitigation funds to the research projects and people around the world who envision a future where agriculture becomes the protagonist in this fraught urgent and unprecedented drama of our time Citizens farmers and funders will be inspired to use the tools presented in this important book to transform degraded lands around the world into productive carbon storing landscapes

Agriculture and the Rural Economy in Pakistan

David J. Spielman, Sohail J. Malik, Paul Dorosh, Nuzhat Ahmad, 2017-01-23 Historically agriculture has been crucial to Pakistan's economic growth and development and remains so even today The sector employs almost half of the country's labor force supplies key inputs to the country's manufacturing sector generates a significant share of export earnings and nourishes a rapidly growing population Further beyond agriculture is the wider rural economy including nonfarm economic activities such as small enterprises transport services village retail shops local schools and clinics all of which account for an estimated 40 to 57 percent of total rural household income Given the importance of these rural activities the slow growth of agriculture in recent years averaging just 2.8 percent during the period 2010-2014 should be a source of concern for Pakistan Can the country's agricultural sector and rural economy once again play a significant role in growth and development Can it contribute to poverty reduction Agriculture and the Rural Economy in Pakistan Issues Outlooks and Policy Priorities seeks to answer these questions by examining the performance of both agriculture and the rural economy The authors identify several measures that can promote agricultural productivity growth as well as wider economic and social development These include increasing the efficiency of water use in the Indus river basin irrigation system especially in the face of climate change reforming policies and regulations that govern markets for agricultural inputs and commodities and improving the provision of rural public services for health education women's empowerment and community development The analyses and conclusions in Agriculture and the Rural Economy in Pakistan will be of use to policy makers development specialists and others concerned with Pakistan's development Contributors Madiha Afzal Nuzhat Ahmad Faryal Ahmed Mubarik Ali Shujat Ali Elena Briones Alonso Hira Channa Stephen Davies Paul Dorosh Gisselle Gajate Garrido Arthur Gueneau Madeeha Hameed Brian Holtemeyer Huma Khan Katrina Kosec Mehrab Malek Sohail J Malik Shuaib Malik Amina Mehmood Dawit Mekonnen Hina Nazli Sara Rafi Muhammad Ahsan Rana Abdul Wajid Rana Danielle Resnick Khalid Riaz Abdul Salam Emily Schmidt Asma Shahzad David J Spielman James Thurlow Ahmad Waqas Edward Whitney Fatima Zaidi
