Johnson, 2025-03-18 How to create value with all the customers in a portfolio from the stronger relationships that increase profit margins to the weaker relationships that increase scale Which would you rather have a smaller watertight bucket of loyal customers or a larger leaky bucket of both loyal and not so loyal customers In Customer Portfolio Management Fred Selnes and Michael Johnson argue that for most companies and organizations the larger leaky bucket is more valuable While loyal customers are generally more profitable the weaker or leaky relationships in a portfolio

provide scale economies and a source of future loyal customers The basic principle behind customer portfolio management CPM they explain is to view a company s market strategies as long term investments in the strength of relationships over an entire portfolio of current and future customers This book helps business leaders understand when and how much to focus on acquiring customers how to defend and leverage those relationships and how to convert some of these relationships into stronger more profitable ones The authors present an implementable framework for CPM that involves segmenting customers into strangers acquaintances friends and partners understanding the lifetime value or revenues and costs over time across relationship segments and determining when and how much to invest in customer acquisition relationship defense relationship leverage and relationship conversion Case studies and examples that include Amazon Apple IKEA and dozens of other companies are used along the way to illustrate effective portfolio management principles and growth strategies

HM Revenue and Customs Great Britain. Parliament. House of Commons. Committee of Public Accounts,2012 This report looks at a range of issues among HM Revenue Customs activities but principally into the corporation tax paid by multinational companies International companies are able to exploit national and international tax structures to minimise corporation tax on the economic activity they conduct in the UK It is believed that this practice is widespread and that HMRC is not taking sufficiently aggressive action to assess and collect the appropriate amount of corporation tax Both HMRC and corporate taxpayers are failing to meet the legitimate public expectations from the tax system Evidence received was unconvincing in some cases evasive and there is concern that multinationals have an unfair competitive advantage A change of mindset needs also to apply to HMRC s approach to the Tax Gap the difference between tax collected and that which in the Department s view should be collected While total tax revenues have increased by 4 billion since 2010 11 the Department s own assessment of the gap stands at 32 billion and has only reduced by 1 billion since 2004 05 HMRC deserves praise for clearing the backlog of un reconciled legacy PAYE cases before its target of December 2012 but is too complacent about the service it provides to customers The next challenges HMRC faces are the roll out of the Real Time Information system and the changes to child benefit The system is vital for the Department for Work and Pensions introduction of Universal Credit but HMRC has no contingency planning to cope with any delays in implementation The Department s performance in reducing the level of error and fraud on the tax credits it pays has got worse rather than better and it has failed to meet its target
