

Grading Multiple-Choice Questions Using the Right-Rule Method and Strategies 1.1 Student Learning Objectives: 1. Final-Grade strategies

Effective weighting strategies is applied to a set of responses, more important (weight) is placed on some components of the test. One final strategy on this video is probably the simplest of a weighting strategy.

Consider two grading systems for determining your final class average. Each system is a weighting strategy of measures final, midterm exam grades, final exam grade, homework, and class participation.

Grading System 1	Grading System 2
Final average = 40%	Final average = 40%
Final exam grade = 20%	Final exam grade = 10%
Homework = 20%	Homework = 25%
Class participation = 20%	Class participation = 25%

1. If your values are the following, which grading system do you prefer, and why?

- Final average = 88
- Final exam grade = 88
- Homework = 90
- Class participation = 90

2. If your score 1 dropped highest on the final exam, how does your final grade average change under each system?
