

Fundamental Counting Principle: *The counting principle suggests if one event has m possible outcomes and a second independent event has n possible outcomes, then there are $m \times n$ total possible outcomes for the two events together.
(This basically suggests Options - Options - Options..... will determine the number of possible outcomes.)*

Permutations: A collection of things, in which the order does matter.

Combinations: A collection of things, in which the order does NOT matter.

Directions: No Work = No Full Credit. Then, determine the number of possibilities:

- How many unique license plates tags can be created if each is 6 characters such that the first three characters can be any letter or number but no character is allowed to be repeated in the first three characters, and the last three spaces can be any letter or number?
- The Mrs. Georgia pageant is taking place and there are 20 contestants. How many different ways could the pageant have a winner and a runner up? permutation $20P2=20 \times 19$ (380)
