America Past And Present 6th Edition:

America's New Empire Richard F. Hamilton, 2017-07-05 In this volume Hamilton deals with some of the antecedents and the outcome of the Spanish American war specifically the acquisition of an American empire It critiques the progressive view of those events questioning the notion that businessmen and compliant politicians aggressively sought new markets particularly those of Asia Hamilton shows that United States exports continued to go predominantly to the major European nations The progressive tradition has focused on empire specifically on the Philippines depicted as a stepping stone to the China market Hamilton shows that the Asian market remained minuscule in the following decades and that other historical works have neglected the most important change in the nation's trade pattern the growth of the Canada market which two decades after the 1898 war became the United States largest foreign market The book begins with a review and criticism of the basic assumptions of the progressive framework These are first that the nation is ruled by big business political leaders being compliant co workers Second that those businessmen are zealous profit seekers And third that they are well informed rational decision makers A further underlying assumption is that the economy was not functioning well in the 1890s and that a need for new markets was recognized as an urgent necessity so that big business accordingly demanded world power and empire Each of these assumptions pivotal elements in the dominant progressive tradition in historical writing is challenged with an alternative viewpoint presented Hamilton presents a different more complex view of the events following the Spanish American War The class dominance theory is not supported The alternative argued here elitism proves appropriate and more useful This review and assessment of arguments about American expansion in the 1890s adds much to the literature of the period

Wiseman,2021-04-22 This book examines the discourses on nation building civic identity minorities and the formation of religious identities in school textbooks worldwide It offers up to date practical and scholarly information on qualitative and mixed method textbook analysis as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social political and economic groups affect textbook production and the curricular aims in different educational systems worldwide Chapters address the role of school textbooks in developing nationhood the creation of citizenship through school textbooks the complexity of gender in normative discourses and the intersection of religion and culture in school textbooks The Churching of America, 1776-2005 Roger Finke,Rodney Stark,2005-03 Although many Americans assume that religious participation has declined in America Finke and Stark present a different picture In 1776 fewer than 1 in 5 Americans were active in church affairs Today church membership includes about 6 out of 10 people But as Finke and Stark show not all denominations benefited They explain how and why the early nineteenth century churches began their descent while two newcomer sects the Baptists and the Methodists gained ground They also analyze why the Methodists then began a long downward slide why the Baptists continued to succeed how the Catholic Church met the competition of ardent Protestant missionaries and why the Catholic commitment has declined since Vatican II The authors also explain why ecumenical movements always fail In short Americans are not abandoning religion they have been moving away from established denominations A church sect process is always under way Finke and Stark argue as successful churches lose their organizational vigor and are replaced by less

worldly groups Some observers assert that the rise in churching rates indicates increased participation not increased belief Finke and Stark challenge this as well They find that those groups that have gained the greatest numbers have demanded that their followers accept traditional doctrines and otherworldliness They argue that religious organizations can thrive only when they comfort souls and demand sacrifice When theology becomes too logical or too secular it loses people Not June Cleaver Joanne Jay Meyerowitz,1994 In the popular stereotype of post World War II America women abandoned their wartime jobs and contentedly retreated to the home This work unveils the diversity of postwar women showing how far women departed from this one dimensional image **Fatal Fascinations** Suzanne Bray,Gérald Préher,2014-07-18 What is crime What constitutes violence What is it permissible to talk about or describe in cultural depictions of crime and violence What is the impact of portraying crime and violence on an audience How are crime and violence presented to make them culturally acceptable for educational or entertainment purposes This book examines representations of violence and crime both historically and in relation to contemporary culture across a wide range of media including fiction film art biography and journalism to interrogate the issues raised While some articles here analyze the ethics invoked by different representative frameworks the danger that violence will be treated as spectacle and the implications of using violence as a polemical device to shift public sentiment others address the relationship between coercive power crime and violence that is not necessarily primarily physical and the political or ideological contexts in which narratives of good and evil are constructed and crime defined **America, Past and Present** Robert A.
