Let There Be Light! Robert S. Dutch, 2017-06-16 Have you ever wondered what it is like to work on a nuclear power plant Robert Dutch worked in the UK's nuclear industry for many years as a scientist and then as a tutor at a nuclear training center He also holds degrees in theology Drawing upon his qualifications and experience Robert addresses the controversial issue of nuclear power from a Christian perspective In contrast to a negative nuclear narrative often portrayed he presents a positive nuclear narrative alongside other ways of generating electricity Be prepared to be challenged to think seriously about nuclear's merits in providing clean low carbon electricity *Daily Graphic* Ransford Tetteh, 2014-04-15

Engineering Psychology and Cognitive Ergonomics Don Harris, 2014-06-06 This book constitutes the refereed proceedings of the 11th International Conference on Engineering Psychology and Cognitive Ergonomics EPCE 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Greece in June 2014 jointly with 13 other thematically similar conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 54 contributions included in the EPCE proceedings were carefully reviewed and selected for inclusion in this volume and are organized in the following topical sections mental workload and stress visual perception cognitive issues in interaction and user experience cognitive psychology in aviation and space transport and industrial applications Reproducibility and Replicability in Science National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Science, Engineering, Medicine, and Public Policy, Board on Research Data and Information, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Board on Mathematical Sciences and Analytics, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Reproducibility and Replicability in Science, 2019-10-20 One of the pathways by which the scientific community confirms the validity of a new scientific discovery is by repeating the research that produced it When a scientific effort fails to independently confirm the computations or results of a previous study some fear that it may be a symptom of a lack of rigor in science while others argue that such an observed inconsistency can be an important precursor to new discovery Concerns about reproducibility and replicability have been expressed in both scientific and popular media As these concerns came to light Congress requested that the National Academies of Sciences Engineering and Medicine conduct a study to assess the extent of issues related to reproducibility and replicability and to offer recommendations for improving rigor and transparency in scientific research Reproducibility and Replicability in

Science defines reproducibility and replicability and examines the factors that may lead to non reproducibility and non replicability in research Unlike the typical expectation of reproducibility between two computations expectations about replicability are more nuanced and in some cases a lack of replicability can aid the process of scientific discovery This report provides recommendations to researchers academic institutions journals and funders on steps they can take to improve reproducibility and replicability in science

Engineering Dynamics and Vibrations Junbo Jia, Jeom Kee Paik, 2018-12-12 Engineering dynamics and vibrations has become an essential topic for ensuring structural integrity and operational functionality in different engineering areas However practical problems regarding dynamics and vibrations are in many cases handled without success despite large expenditures This book covers a wide range of topics from the basics to advances in dynamics and vibrations from relevant engineering challenges to the solutions from engineering failures due to inappropriate accounting of dynamics to mitigation measures and utilization of dynamics It lays emphasis on engineering applications utilizing state of the art information Responses of Marine Microbes to Multiple Environmental Drivers of Global Change: the Interplay of Abiotic and Biotic Factors Yuanyuan Feng, Shengwei Hou, Feixue Fu, Michael Yu Roleda, 2022-10-17 China, Trust and Digital Supply Chains Warwick Powell, 2022-09-01 China Trust and Digital Supply Chains presents a critical reflection on blockchain technologies in the context of their adoption in China and the world that China is engaged in and shaping Approaching the issues of blockchain technology adoption and development on China's own terms is critical if policy makers and others are to make effective sense of one of the key dynamics shaping the next few decades of the global landscape The work challenges the trust trope that dominates much discussion of blockchain technology's application It argues contrary to the predominant trust trope that blockchain is not about trust at all It shows that China's reimagining of the 21st century global order is premised on driving intensified cross border economic interactions without the presupposition of trust and blockchain technology makes that

possible It also explores the paradox of technological decentralisation being taken up with vigour by a centralist polity the role of blockchain technology as a critical condition of existence for the successful globalisation of China's digital currency initiative and the need to devise governance institutions that are multilateral in nature to reflect the multi polar nature of decentralised information systems with domestic and cross border permutations This book is of significant interest to readers of political economy public policy blockchain technology and Chinese studies
