has involved a number of competing statutes and policies that rewarded different types of heroism In this book the first comprehensive look at the medal s historical legal and policy underpinnings Dwight S Mears charts the complex evolution of these developments and differences over time The Medal of Honor has had different qualification thresholds at different times and indeed three separate versions one for the army and two for the navy existed contemporaneously between World Wars I and II Mears traces these versions back to the medal s inception during the Civil War and continues through the ongoing wars in Iraq and Afghanistan along the way describing representative medal actions for all major conflicts and services as well as legislative and policy changes contemporary to each period He gives particular attention to retroactive army awards for the Civil War World War I legislation that modernized and expanded the army s statutory award authorization the navy s grappling with both a combat and noncombat Medal of Honor through much of the twentieth century the Vietnam era act that ended noncombat awards and largely standardized the Medal of Honor among all services and the perceived decline of Medals of Honor awarded in the ongoing Global War on Terror Mears also explores the tradition of awards via legislative bills of relief extralegislative awards administrative routes to awards through Boards of Correction of Military Records restoration of awards previously revoked by the army in 1917 judicial review of military actions in federal court and legislative actions intended to atone for historical discrimination against ethnic minorities Unprecedented in scope and depth his work is sure to be the definitive resource on America s highest military honor *Supplement to the Draft Environmental Impact Statement and the Proposed Land Management Plan for the Targhee National Forest* ,1984 Errors and Biases in Modern Healthcare: Public Health, Medico-legal and Risk Management Aspects Simone Grassi,Davide Ferorelli,Francesco De Micco ,Francesco Ausania,2025-09-30 Preventing errors and governing their consequences is one of the most important challenges in modern healthcare The field of healthcare is currently grappling with the complexities of errors and biases that arise from both human and technological sources The trade off between organizational targeted and human targeted interventions to prevent these errors is complicated by the role that may be played by individual e g cognitive failures and by the evidence that error in medicine is often not a random event tending to recur in some professionals Recent studies have highlighted the non random nature of medical errors suggesting that certain professionals may be more prone to recurring mistakes Moreover the integration of artificial intelligence in healthcare introduces new challenges such as communication of risks and patient engagement and new kinds of errors biases that have different causes and thus require different solutions Despite ongoing efforts to address these issues there remains a significant gap in understanding the root causes of these errors and biases as well as the effectiveness of various interventions Popular Science ,1998-05 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better Cannabis Criminology Johannes Wheeldon,Jon Heidt,2022-12-30 Cannabis
