Additionally, governing bodies have heightened expectations related to student success, retention, and time to degree, thus holding institutions of higher education more accountable. With a changing student demographic and increased accountability measures, faculty and administrators are seeking effective strategies to enhance intercultural responsiveness among underrepresented populations to support their success. *Developing an Intercultural Responsive Leadership Style for Faculty and Administrators* is a critical research publication that examines student retention and success among underrepresented college student populations by analyzing factors impacting their persistence towards graduation, as well as exploring strategies to enhance intercultural responsiveness among these populations. Education Abroad and the Undergraduate Experience Elizabeth Brewer, Anthony C. Ogden, 2023-07-03

Co-published with This volume focuses on two questions: First, how can education abroad be embedded into undergraduate education so that students experience it as an integral component of their education and something they help shape, rather than as time away from their education and as a commodity to be consumed? Second, how can colleges and universities maximize the educational value of education abroad by forging stronger connections between it and other undergraduate experiences? The volume argues that learning abroad be positioned within the work of the larger institution and students' overall education. Organized within three sections, this volume makes the case that learning abroad must be positioned within the work of the larger institution and students' overall education. In doing so, it questions many current assumptions and stimulates thinking about the power of an integrative approach to education abroad to lead to lasting educative value. An integrative approach requires that students be afforded multiple opportunities and ongoing support to draw connections with their learning abroad with other dimensions of their undergraduate education. Chapters cover topics such as the additive value of integrating multiple HIPs with education abroad to span disciplinary boundaries and promote an array of soft or operational skills; the importance of maintaining the disruptive quality of the encounter with the foreign to enrich study at home; issues of commodification and reciprocity; increasing access to study abroad to community college, particularly adult populations; facilitating students' social and intellectual development; identity formation and reflective practice; rethinking orientation programming to emphasize the continuity of learning pre, during, and post education abroad; asking fundamental questions about the purpose of education.

abroad to rethink assessment and its purposes the faculty role in the internationalization of the curriculum and developing more intentional relationships with in field partners and international educational organizations to more effectively connect leaning abroad with other dimensions of undergraduate education For everyone involved in international education whether SIOs faculty department chairs or deans the critical questions and new perspectives offered here will inform and shape the growing movement to integrate education abroad with the overall undergraduate experience OECD Skills Studies Raising the Basic Skills of Workers in England, United Kingdom OECD,2020-12-18 This report provides examples and recommendations to help overcome obstacles to engage low skilled workers and their employers in skills development England has implemented impressive measures aimed at helping workers and employers to upskill Nonetheless there remains room for improvement **A Good Job** George S. McClellan,Kristina L. Creager,Marianna Savoca,2023-07-03 For many students working while in college is a defining characteristic of the undergraduate experience However student workers often view campus employment as a money making opportunity rather than a chance for personal development Likewise institutions often neglect to consider campus jobs as a means to education and student engagement It is the distinction between work for remuneration and work for personal development which shapes much of the discussion of student employment throughout A Good Job This book makes the case for campus employment as a high impact practice in higher education and provides models for institutional efforts to implement new student employment strategies Carefully designed campus employment opportunities can have numerous benefits including career exploration and preparation learning and increased engagement leading to increased retention The authors make the case that employment can and should be a purposeful and powerful component in any higher education institution s efforts to support student learning development and success This book is an excellent resource for anyone interested in capitalizing on the developmental and learning potential of student employment on campus *OECD Skills Studies The Assessment Frameworks for Cycle 2 of the Programme for the International Assessment of Adult Competencies* OECD,2021-04-30 The OECD s Programme for the International Assessment of Adult Competencies PIAAC represents a comprehensive international comparative assessment of the information processing skills of adults vital for the full participation in social and economic life in the 21st century PIAAC is now in its second cycle and continues a series of international assessments of adult skills that began in the mid 1990s with the International Adult Literacy Survey IALS Handbook of Research-Based Practices for Educating Students with Intellectual Disability Karrie A.
