

# DESIGNING FOR ALL AGES & ABILITIES

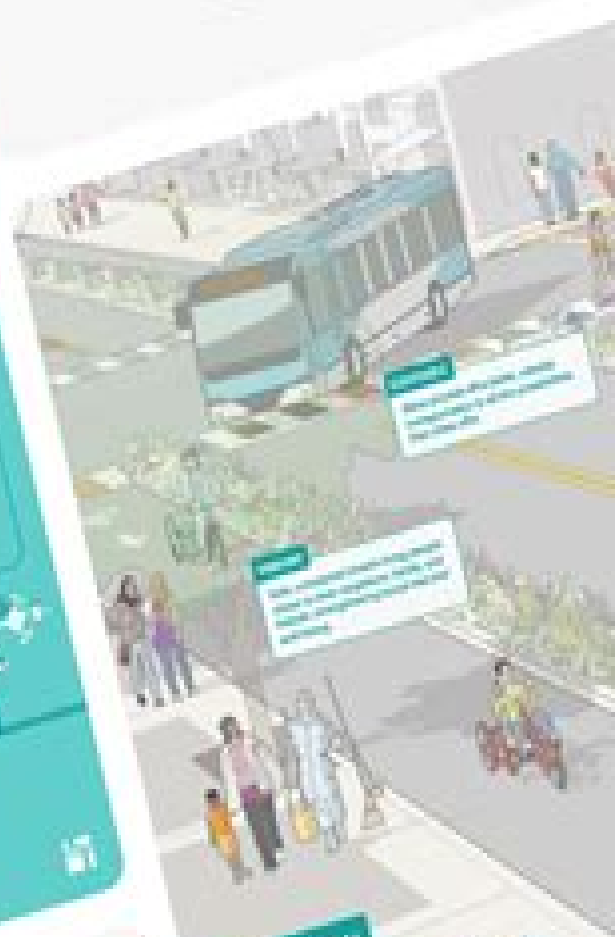

Every design must meet the needs of a diverse range of potential bike riders. Across North America, however, many existing bike facility designs provide enough comfort for only the healthiest people living and exclude many who might otherwise ride.

**IN ALL AGES & ABILITIES** people deserve to use their local communities and provide ideas for alternative transportation. A good design is one that is safe, healthy, and accessible to all. It is a design that is not just for the young and fit, but for all ages and abilities. It is a design that is not just for the young and fit, but for all ages and abilities. It is a design that is not just for the young and fit, but for all ages and abilities.

Third Edition

The third edition of the Urban Bikeway Design Guide revised (existing) standards for bike lanes, bikeways, and other facilities to make city streets safer and more accessible.

## OUR VISION

Cities where safe, sustainable, and equitable transportation systems connect communities to the resources they need to thrive
