Leduc, Princeton Review (Firm), 2000 The Princeton Review realizes that acing the Algebra II exam is very different from getting straight As in school. They don't try to teach students everything there is to know about algebra; only the techniques they'll need to score higher on the exam. There's a big difference. In *Cracking the Virginia SOL EOC Algebra II*, TPR will teach test takers how to think like the test makers and eliminate incorrect answer choices using Process of Elimination and other techniques. Earn more points by Plugging In numbers in place of letters on algebra problems. Use Backsolving to solve problems when test takers are unsure of the answer. Test knowledge with review questions for each algebra concept covered. This book includes 2 full-length simulated End of Course Algebra II exams. All of TPR's sample test questions are just like the ones test takers will see on the actual exam, and TPR fully explains every solution. Contents include Structure and Strategies, Expressions and Operations, Equations and Inequalities, Functions, Analytic Geometry, and Algebraic Systems II.
