shows how Abramsky's work has led to a powerful new paradigm for the semantics of computation. The work on contextuality and categorical quantum mechanics has been highly influential and provides the foundation for increasingly widely used methods in quantum computing. The work on monads and descriptive complexity is building bridges between currently disjoint research areas in computer science relating Structure to Power. The volume also includes a scientific autobiography and an overview of the contributions. The outstanding set of contributors to this volume including both senior and early career academics serve as testament to Samson Abramsky's enduring influence. It will provide an invaluable and unique resource for both students and established researchers.

*Playful Design* John Ferrara, 2012-05-17 Game design is a sibling discipline to software and Web design but they're siblings that grew up in different houses. They have much more in common than their perceived distinction typically suggests and user experience practitioners can realize enormous benefit by exploiting the solutions that games have found to the real problems of design. This book will show you how.

Biomedical Visualisation Paul M. Rea, 2020-11-19 This edited book explores the use of technology to enable us to visualise the life sciences in a more meaningful and engaging way. It will enable those interested in visualisation techniques to gain a better understanding of the applications that can be used in visualisation imaging and analysis education engagement and training. The reader will be able to explore the utilisation of technologies from a number of fields to enable an engaging and meaningful visual representation of the biomedical sciences with a focus in this volume related to anatomy and clinically applied scenarios. The first six chapters in this volume show the wide variety of tools and methodologies that digital technologies and visualisation techniques can be utilised and adopted in the educational setting. This ranges from body painting clinical neuroanatomy histology and veterinary anatomy through to real time visualisations and the uses of digital and social media for anatomical education. The last four chapters represent the diversity that technology has to be able to use differing realities and 3D capture in medical visualisation and how remote visualisation techniques have developed. Finally it concludes with an analysis of image overlays and augmented reality and what the wider literature says about this rapidly evolving field.
