Scott A J Johnson, 2016-09-19 Ideas abound as to why certain complex societies collapsed in the past including environmental change subsistence failure fluctuating social structure and lack of adaptability *Why Did Ancient Civilizations Fail* evaluates the current theories in this important topic and discusses why they offer only partial explanations of the failure of past civilizations This engaging book offers a new theory of collapse that of social hubris Through an examination of Mesopotamian Egyptian Roman Maya Inca and Aztec societies Johnson persuasively argues that hubris blinded many ancient peoples to evidence that would have allowed them to adapt and he further considers how this has implications for contemporary societies Comprehensive and well written this volume serves as an ideal text for undergraduate courses on ancient complex societies as well as appealing to the scholar interested in societal collapse

Identification of Ancient Olive Oil Processing Methods Based on Olive Remains Peter Warnock,2007 This research focuses on the complex issue of olive oil processing and the resulting technological changes associated with the olive oil industry during this industry s expansion from a small scale domestic to large scale industrial technology during the Chalcolithic through Iron Ages c 4300 586 BC in Syro Palestine The ultimate goal is to see if the level or type of olive oil technology used at sites can be determined based on their olive remains However

before this could occur the author prepares a methodology the components of which include 1 an ethnographic study investigating how traditional oil pressing and processing affect olive remains and the incorporation of those remains into the archaeological record and 2 experimental studies to determine how different processing methods might affect olive remains and their incorporation into the archaeological record The results from the experimental and ethnographic studies are then applied to archaeological remains from a Late Neolithic site to determine the possible type of processing technology The type of processing indicated by the comparison of the experimental to the archaeological remains crushing in a small basin matches the olive oil processing artifacts and features found at the site The methods used in this study can be applied to other paleoethnobotanical remains and technologies
