Mateu, 2024-12-31 The second edition of this book provides a completely updated account of the structure dynamics and physics of viral particles from the moment they emerge by self assembly from viral components produced in the infected cell through their extracellular stage

until they recognize and infect a new host cell and cease to exist as they lose their physical integrity to initiate a new infectious cycle. New insights into the structure of viruses, their physical properties and mechanisms of action derived from results obtained in the last decade have been included as well as other bio physical techniques to study the structure or dynamics of virus particles and components. These include among many others new advances in high resolution electron cryomicroscopy, novel approaches in the use of electron cryotomography or the application of soft X ray tomography to study viruses in the infected cell, high speed atomic force microscopy to study virus assembly and dynamics and the development of new antiviral drugs and vaccines as well as of many nanomedical and nanotechnological applications of virus particles. New chapters on the study of viruses inside infected cells and on technological applications of modified viral particles have been included in this second edition. The book is still aimed primarily at Master's students, Ph.D. students and postdoctoral researchers with degrees in biology, chemistry, physics or related scientific disciplines who have an interest in or are working with viruses. It provides an up to date overview of many important concepts, techniques, studies and applications in structural and physical virology for specialized researchers working with viruses regardless of their field of specialization, covering the latest research together with fundamental concepts and well established facts. In short, this book is basic enough to be used by undergraduate and Ph.D. students but advanced and up to date enough for experienced scientists with an interest in structural and or physical virology.
