But after three decades of climate COPs we are accelerating into a polycrisis of climate, food security, biodiversity, pollution, inequality, and more. What exactly has been holding us back? Mike Berners-Lee looks at the challenge from new angles. He stands further back to gain perspective; he digs deeper under the surface to see the root causes; he joins up every element of the challenge and he learns lessons from our failures of the past. He spells out why if humanity is to thrive in the future the most critical step is to raise standards of honesty in our politics, our media, and our businesses. Anyone asking what each of us can do right now to help will find inspiration in this practical and important book.

Any teacher can become more effective and engaging by laughing along with these simple exercises. Instead of using look-at-me tactics to get students' attention, Hoovler wants to do the opposite: he uses humor to focus attention on the lesson, not the instructor, and guide a distracted class back on track. With anecdotes and explanations, Hoovler walks you through how to use certain jokes to keep students engaged and on task. You'll get prompts and ideas for exercises to use in your own classes from an expert with decades of experience. Even those who aren't teachers will enjoy this seasoned educator's Dave Barry-esque takes on public schools, the history of teaching, educational philosophy, and what exactly makes a joke-telling teacher good versus unbearably corny. *Teaching with Comedy* is the perfect gift for any teacher or comedy fan seeking light but meaningful reading fare. **Instructor**, 2007 Science John Michels (Journalist), 2011 **Los Angeles Magazine**, 2006-02 Los Angeles magazine is a regional magazine of national stature.
