Success in Reading and Writing Patricia Horne Sumner, Helen Cappelman, Jean F. Bernholz, 1991-10 Educational resource for teachers, parents and kids

Teacher Acculturation Edward R. Howe, 2022-03-16 This book evolved from decades of transcultural experiences. Edward Howe's comparative ethnographic narrative a blend of narrative inquiry and reflexive ethnography uniquely captures the essence of teacher acculturation. Each chapter is filled with intriguing teachers' stories based on lived experiences connected through the common thread of learning to teach. Compelling teacher narratives spanning seven decades show that much of what teachers do is learned implicitly and is culturally embedded. Teacher Acculturation provides a window into the world of novice teachers from the 1950s through present day. The thought-provoking stories provide a springboard for critical discussions about gender, sexuality, culture, race, ethnicity, Indigenous perspectives, SES, class, religion, location, space, time, and the challenges facing teachers in different contexts. The author highlights the importance of teacher relationships built on mutual understanding, trust, mentorship, leadership, and guidance. Beginning teachers are largely required to work in isolation to learn their practice through trial and error, left to sink or swim. There is little provision for mentorship and insufficient time to reflect on teaching practices. Collaborative and reflective self-study as illustrated in *Teacher Acculturation* shows great promise to ameliorate this pervasive problem in teacher induction. Thus the book will appeal to teacher educators, teachers, and to anyone interested in the fascinating lives of teachers.

Investigations into Assessment in Mathematics Education M. Niss, 2013-06-29 This book is one of the first to attempt a systematic in-depth analysis of assessment in mathematics education. In most of its important aspects, it deals with assessment in mathematics education from historical, psychological, sociological, epistemological, ideological, and political perspectives. The book is based on work presented at an invited international ICMI seminar and includes chapters by a team of outstanding and prominent scholars in the field of mathematics education. Based on the observation of an increasing mismatch between the goals and accomplishments of mathematics education and prevalent assessment modes, the book assesses assessment in mathematics education and its effects. In so doing, it pays particular attention to the need for and possibilities of assessing a much wider range of abilities than before, including understanding, problem solving, and posing, modelling, and creativity. The book will be of particular interest to mathematics educators who are concerned with the role of assessment in mathematics education, especially as regards innovation, and to everybody working within the field of mathematics education and related areas in R D curriculum planning, assessment institutions, and agencies, teacher trainers, etc.
