Neonatal and Pediatric Respiratory Care - E-Book Brian K. Walsh, 2018-09-06. Learn to improve the respiratory care of neonates, infants, and children. Neonatal and Pediatric Respiratory Care, 5th Edition, gives you a solid foundation in the assessment and treatment of respiratory disorders. Clear, full-color coverage simplifies the principles of respiratory care while emphasizing clinical application. A critical piece in respiratory care's total curriculum solution, this new edition includes all the changes in current clinical practice and in the education environment. Learning objectives at the beginning of each chapter break down key content into measurable behaviors, criteria, and conditions, and self-assessment questions provide an excellent review for the NBRC Neonatal/Pediatric Specialty exam. UPDATED Content reflects the latest developments in the field, meeting the needs of AD programs and BS Respiratory Care programs, which are growing in this field. NBRC exam-style assessment questions test your comprehension of the material in each chapter. Neonatal and pediatric disorders case studies provide an opportunity to see how content covered in the text applies to the more difficult areas of care for neonatal and pediatric disorders. Comprehensive test preparation is provided through coverage of all the content in the matrix for the NPS exam. Learning objectives at the beginning of each chapter highlight what you should learn by breaking down key content into measurable behaviors, criteria, and conditions. Academic and authoritative presentation of content covers all of the major topics of respiratory care for neonates, infants, and children, including both theory and application. Dedicated Quality and Safety chapter addresses quality care for the neonatal/pediatric patient. NEW Revised chapter on Invasive Mechanical Ventilation of the Neonate and Pediatric Patient conforms to the new terminology and taxonomy for modes of ventilation. NEW Additional case studies provide more application opportunities for you. NEW Revised content better correlates to the NBRC NPS exam.

Nutrition in the Prevention and Treatment of Disease Ann M. Coulston, Carol J. Boushey, Mario Ferruzzi, 2013. This comprehensive clinical nutrition textbook uniquely focuses on the clinical applications and disease prevention of nutrition, clearly linking the contributions of basic science to applied nutrition research and, in turn, to research-based patient care guidelines.

Integrating Evolutionary Biology into Medical Education

Jay Schulkin,Michael Power,2019-12-19 Clinicians and scientists are increasingly recognising the importance of an evolutionary perspective in studying the aetiology prevention and treatment of human disease the growing prominence of genetics in medicine is further adding to the interest in evolutionary medicine In spite of this too few medical students or residents study evolution This book builds a compelling case for integrating evolutionary biology into undergraduate and postgraduate medical education as well as its intrinsic value to medicine Chapter by chapter the authors experts in anthropology biology ecology physiology public health and various disciplines of medicine present the rationale for clinically relevant evolutionary thinking They achieve this within the broader context of medicine but through the focused lens of maternal and child health

with an emphasis on female reproduction and the early life biochemical immunological and microbial responses influenced by evolution The tightly woven and accessible narrative illustrates how a medical education that considers evolved traits can deepen our understanding of the complexities of the human body variability in health susceptibility to disease and ultimately help guide treatment prevention and public health policy However integrating evolutionary biology into medical education continues to face several roadblocks The medical curriculum is already replete with complex subjects and a long period of training The addition of an evolutionary perspective to this curriculum would certainly seem daunting and many medical educators express concern over potential controversy if evolution is introduced into the curriculum of their schools Medical education urgently needs strategies and teaching aids to lower the barriers to incorporating evolution into medical training In summary this call to arms makes a strong case for incorporating evolutionary thinking early in medical training to help guide the types of critical questions physicians ask or should be asking It will be of relevance and use to evolutionary biologists physicians medical students and biomedical research scientists
