Semi-Infinite Algebraic Geometry of Quasi-Coherent Sheaves on Ind-Schemes Leonid Positselski, 2023-09-14 Semi Infinite Geometry is a theory of doubly infinite dimensional geometric or topological objects In this book the author explains what should be meant by an algebraic variety of semi infinite nature Then he applies the framework of semiderived categories suggested in his previous monograph titled Homological Algebra of Semimodules and Semicontramodules Birkhäuser 2010 to the study of semi infinite algebraic varieties Quasi coherent torsion sheaves and flat pro quasi coherent pro sheaves on ind schemes are discussed at length in this book making it suitable for use as an introduction to the theory of quasi coherent sheaves on ind schemes The main output of the homological theory developed in this monograph is the functor of semitensor product on the semiderived category of quasi coherent torsion sheaves endowing the semiderived category with the structure of a tensor triangulated category The author offers two equivalent constructions of the semitensor product as well as its particular case the cotensor product and shows that they enjoy good invariance properties Several geometric examples are discussed in detail in the book including the cotangent
