

## 7-2 Inverses of Relations and Functions

You can also find and apply inverses to relations and functions. To graph the **inverse relation**, you can reflect each point across the line  $y = x$ . This is equivalent to switching the  $x$ - and  $y$ -values in each ordered pair of the relation.

### Remember!

A *relation* is a set of ordered pairs. A *function* is a relation in which each  $x$ -value has, at most, one  $y$ -value paired with it.
