Quantum Physics Dillard W. Faries, 2017-11-07 Science and faith have had a long intertwined history The relationship has run the gamut from a total disconnect to an adversarial battleground where proponents of each claim total victory However if God created the physical world and remains active in the physical world we cannot ignore the interaction nor can we assume or expect a world of conflict While nineteenth century physics brought classical physics which quite reasonably divorced God and nature to a culmination twentieth century physics especially quantum physics has opened a new realm of possible interactions Even though one can reasonably say that no one understands quantum physics the fruits of the discipline overflow the cornucopia People of faith can share the feast and people of science are welcome at the table of faith

excellent book by Dr Gregory Matloff could be viewed as a large multi disciplinary compendium of past research current investigations and future research in astronautics However unlike conventional works that are usually closed this book is an open guide in three main respects it contains progressive exercises as the chapter and section topics evolve it provides the reader with many updated references and it clearly indicates projected research areas that could become current research in the near future For a student the included exercises could be transformed into small worksheets or notebooks featuring many modern symbolic or algebraic computation systems that run on desktop or laptop computers Thus rapid and progressive study is possible a sort of learning library driven by the author and by the bibliography at the end of each chapter More than 340 references for both professionals and students have been selected to provide the reader with a sound basis for expanding his or her knowledge of the many different subjects dealt with authoritatively by the author who for several decades has worked actively in various fields of astronautics A systematic and unhurried study of this book will produce for the reader an extraordinarily enlarged number based view of spaceflight and its significant impact on our future
