To accommodate the additional taxa the number of line drawings in this third edition has increased from 257 to 279 to 295 In addition nine maps illustrate the distributions of species that have been recognized since the publication of maps in the most recent editions of the Peterson Field Guides to the reptiles and amphibians of eastern central and western North America A large number of annotations detail current taxonomic ambiguities or disagreements and the literature cited has been expanded Collectively these features enhance opportunities to teach and learn the classification and identification of amphibians and reptiles in the continental United States and Canada
