Functional programming on the other hand is a programming paradigm that treats computation as the evaluation of mathematical functions and avoids changing state or mutable data It emphasizes concepts such as higher order functions immutability and pure functions

Describe your experience with version control systems like Git Example Answer I have extensive experience using Git for version control in software development projects I am proficient in performing common Git operations such as branching merging rebasing and resolving conflicts I am also familiar with collaborating with team members using Git repositories managing branches and reviewing and merging code changes

How do you ensure the security of your code and prevent common vulnerabilities Example Answer I follow security best practices and principles to ensure the security of my code This includes validating user input sanitizing and escaping data to prevent injection attacks using parameterized queries to prevent SQL injection and implementing proper authentication and authorization mechanisms to control access to sensitive resources I also stay updated with security vulnerabilities and patches and conduct regular code reviews and security audits to identify and address potential vulnerabilities

Can you explain the difference between unit testing and integration testing Example Answer Unit testing is a testing technique where individual units or components of a software application are tested in isolation to ensure that they behave as expected It focuses on testing the smallest units of code such as functions or methods and typically involves writing and executing test cases using a testing framework

Integration testing on the other hand is a testing technique where multiple units or components of a software application are tested together to verify their interactions and integration It focuses on testing the interactions between different units and ensuring that they work together correctly

Describe a challenging problem you encountered during a software development project and how you solved it Example Answer During a recent software development project we encountered a performance bottleneck in the application where certain operations were taking longer than expected to execute After conducting profiling and performance analysis we identified that the bottleneck was caused by inefficient database queries To address this issue we optimized the database queries by adding appropriate indexes rewriting complex queries and caching frequently accessed data As a result we were able to significantly improve the performance of the application and eliminate the bottleneck
