Beyond Matter, Within Space Livia Nolasco-Rózsás, Marianne Schädler, 2024-08-28 Exhibition spaces are physical places of knowledge production and exchange. Their spatial properties play an important role in contextualizing information. Virtual stagings of exhibitions should therefore retain these properties. The Beyond Matter research project 2019-23 aims to unravel the intertwining of physical and virtual structures and their impact on spatial aspects in art production, curating, and art education and thus to identify ways to preserve cultural heritage in the digital age. This publication offers a comprehensive overview of the diverse research activities, exhibition and book projects, and symposia that have taken place or emerged in the course of the international Beyond Matter project at the various partner institutions. *Space Various*, 2022-10-06 Fresh and diverting, informative and topical. Australian Financial Review Best Books of the Year. Night Sleep, Death and the Stars by Lauren Groff. The Universe Underground by Paolo Giordano. We All Hated Each Other So Much by Frank Westermann. Plus discovering new planets and destroying satellites, returning to the Moon this time to stay, the Mars delusion, the hunt for extra terrestrial life and much more. In the 1960s the rivalry between the superpowers brought us into space, adding a whole new dimension to human life. The last frontier was open between 1969 and 1972: twelve men but no women walked on the moon. No one has since. The space race revealed itself for what it really was: a political and military competition. Space agencies, however, have not been idle, and the exploration of the solar system has continued with probes and robots. Without politics, science has thrived. But the lack of government funding has opened space exploration to the forces of capitalism: the race has started again with different rules and different players. For those of us who remain on Earth, space offers a spiritual dimension and the search for answers to age-old questions. Colonizing Mars might not be the solution to humanity's problems, but the promise of space, whether expressed in a tweet by Elon Musk or a photo taken by a NASA rover on Mars, keeps proving irresistible. **The Moon's Galactic History** Constance Victoria Briggs, 2022-10-28 The Moon's Galactic History: A Look at the Moon's Extraterrestrial Past and Its Connection to Earth follows the past and present research about the Moon's strange, enigmatic history with a focus on an extraterrestrial presence. The book examines such questions as: Are there Moon inhabitants? Are the UFOs seen today connected to the Moon? Is there a city on the Moon and more. Additionally, Briggs discusses things observed on the Moon, including anomalous, strange lights, unidentified flying objects, odd constructions, artifacts, symbols, and more. This book examines new thoughts and ideas from researchers and what their ideas are today about the extraterrestrial Moon-Earth connection and what it means for us. With all the information on unidentified flying objects in the news today, it is time to have an updated book with current research that investigates both the past and present material on the Moon. Did you know that several of the NASA astronauts reported seeing UFOs while traveling to the Moon? The Moon might be hollow. Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon. Mysterious, anomalous activity has been seen on the Moon for centuries; there are said to be ruins of structures on the Moon.
