Towards a European Model of Development ,1973 **Sustainability, Care, Play and the Zone of Proximal Development** Louise Bøttcher,Ditte Winther-Lindqvist,Mariane Hedegaard,Marilyn Fleer,2025-09-26 This book addresses

the central issue of children's social situation of development in relation to sustainability care and imagination. The concept of sustainability is topical in current societal discussions but much in need of further elaboration which is provided by this book as an integrated aspect of childcare and child development. It provides an exploration of whether and how sustainability can contribute relevantly to conceptual development within the cultural historical framework with relation to child development more broadly and care and imagination more specifically. A central question in the book is how the concept of sustainability is related to Vygotsky's writings on the zone of proximal development and the social situation of development. It takes on the current need to understand the problem of creating more sustainable societies and practices as interconnected practices for supporting the development of children as present and future sustainability responsible citizens. This book provides a much needed theoretical elaboration of child care as a scientific concept, the practice context of care and a wholistic conceptual approach to care.

Regional Development Theories and Their Application Benjamin Higgins, 2017-07-12 Throughout the world today former nation states as disparate as Yugoslavia, Somalia and Canada have either disintegrated or threaten to splinter into regions. The conflicts are economic, social, ethnic, linguistic, religious, political and cultural. Higgins and Savoie analyze the reasons for these conflicts and show why attempts to eliminate regional disparities within nations have been largely unsuccessful. This volume is a highly readable comprehensive survey of the literature and current debates in the fields of regional economics, development policy and planning.

Mountain Resorts Julia LeMense, 2016-04-22 Mountains are the home of significant ecological resources: wildlife habitat, higher elevation plant systems, steep slopes, delicate soils and water systems. These resources are subject to very visible and growing pressures, most of which are caused by the unique features of mountains. Using as case studies four mountain resorts in the US and Canada, this book analyzes the extent to which the law protects the ecological systems of mountains from the adverse impacts associated with the development, operation and expansion of resorts. In order to examine these issues, *Mountain Resorts* takes an interdisciplinary approach with contributions from ecologists and lawyers who focus on ski-related activities, increasing four season use of the mountains and expanding residential, commercial and recreational development at the mountains base. Its analysis of an array of US and Canadian federal, state and local laws provides a multifaceted exploration of the intersection of ecology and the law at mountain resorts.
