Committee on Electronic Vehicle Controls and Unintended Acceleration, 2012 TRB has released the final version of TRB Special Report 308 *The Safety Promise and Challenge of Automotive Electronics Insights from Unintended Acceleration* which examines how the National Highway Traffic Safety Administration NHTSA regulatory research and defect investigation programs can be strengthened to meet the safety assurance and oversight challenges arising from the expanding functionality and use of automotive electronics The report gives particular attention to the NHTSA response to consumer complaints of vehicles accelerating unintentionally and to concerns that faulty electronic systems may have been to blame The committee that produced the report found that the increasingly capable and complex electronics systems being added to automobiles present many opportunities for making driving safer but also present new demands for ensuring their safe performance These safety assurance demands pertain both to the automotive industry development and deployment of electronics systems and to the safety oversight role of NHTSA With regard to the latter the committee recommends that NHTSA give explicit consideration to the oversight challenges arising from automotive electronics and that the agency develop and articulate a long term strategy for meeting these challenges Provided by publisher The Cutting Edge Rod Millen, 2014-08-15 One of New Zealand's greatest rally drivers and a hill climbing superstar tells his inspiring story for the very first time Rod Millen was a hero of New Zealand rallying in the 1970s Having won several championships he quickly established himself as New Zealand's number one driver But thereafter Millen went on to do what very few Kiwis have achieved finding podium success in American motorsport He won the North American Race and Rally Championship in 1979 1980 and 1981 then in 1989 Millen
