with these Ga evic and his co authors try to fill this gap by detailing how to use model driven engineering for ontology development on the Semantic Web Part I of their book describes existing technologies tools and standards like XML RDF OWL MDA and UML Part II presents the first detailed description of OMG s new ODM Ontology Definition Metamodel initiative a specification which is expected to be in the form of an OMG language like UML Finally Part III is dedicated to applications and practical aspects of developing ontologies using MDA based languages For this second edition the descriptions of the related standards like MOF ODM OCL and OWL have been revised and updated new chapters introducing the basic principles of model driven engineering recent research results on metamodeling Semantic Web rule languages an introduction to the Atlas Transformation Language ATL and its tool support and last but not least many new examples have been added
