Throttle Cable Inspection

Check for smooth rotation of the throttle grip from the full open to the full close position. Check both when at full left and full right steering positions. Inspect the condition of throttle cable from the throttle grip down to the carburetor. If the cable is kinked, chafed or improperly routed, it should be replaced and/or rerouted. Recheck cable for tension or stress at both full left and full right steering positions.

Throttle Cable Adjustment

Standard throttle grip free play is approximately 10-15° of the grip rotation. This free play can be attained by adjustment of the throttle cable adjuster. Turn the adjuster until the grip free play rotation becomes 10-15°.
