Theory Ellen E. Eischen, Ling Long, Rachel Pries, Katherine E. Stange, 2016-09-26 Exploring the interplay between deep theory and intricate computation this volume is a compilation of research and survey papers in number theory written by members of the Women In Numbers WIN network principally by the collaborative research groups formed at Women In Numbers 3 a conference at the Banff International Research Station in Banff Alberta on April 21 25 2014 The papers span a wide range of research areas arithmetic geometry analytic number theory algebraic number theory and applications to coding and cryptography The WIN conference series began in 2008 with the aim of strengthening the research careers of female number theorists The series introduced a novel research mentorship model women at all career stages from graduate students to senior members of the community joined forces to work in focused research groups on cutting edge projects designed and led by experienced researchers The goals for Women In Numbers 3 were to establish ambitious new collaborations between women in number theory to train junior participants about topics of current importance and to continue to build a vibrant community of women in number theory Forty two women attended the WIN3 workshop including 15 senior and mid level faculty 15 junior faculty and postdocs and 12 graduate students **Methodological Issues in Psychology** David

Trafimow, 2023-08-17 Methodological Issues in Psychology is a comprehensive text that challenges current practice in the discipline and provides solutions that are more useful in contemporary research both basic and applied This book begins by equipping the readers with the underlying foundation pertaining to basic philosophical issues addressing theory verification or falsification distinguishing different levels of theorizing or hypothesizing and the assumptions necessary to negotiate between these levels It goes on to specifically focus on statistical and inferential hypotheses including chapters on how to

dramatically improve statistical and inferential practices and how to address the replication crisis Advances to be featured include the author's own inventions the a priori procedure and gain probability diagrams and a chapter about mediation analyses which explains why such analyses are much weaker than typically assumed The book also provides an introductory chapter on classical measurement theory and expands to new concepts in subsequent chapters The final measurement chapter addresses the ubiquitous problem of small effect sizes in psychology and provides recommendations that directly contradict typical thinking and teaching in psychology but with the consequence that researchers can enjoy dramatically improved effect sizes Methodological Issues in Psychology is an invaluable asset for students and researchers of psychology It will also be of vital interest to social science researchers and students in areas such as management marketing sociology and experimental philosophy

Statistics and Data Analysis for Social Science Eric J. Krieg, 2019-07-11 Apply statistics to your everyday life Statistics and Data Analysis for Social Science helps students to build a strong foundational understanding of statistics by providing clarity around when and why statistics are useful Rather than focusing on the how to of statistics author Eric J Krieg simplifies the complexity of statistical calculations by introducing only what is necessary to understanding each concept Every chapter is written around and applied to a different social problem or issues enabling students to broaden their imagination about the statistical tools that can be used to make sense of our world and maybe to make the world a better place In addition to updating all the tables and examples with new data the Second Edition has replaced the section on SPSS with three new sets of exercises at the end of each chapter Chapter Exercises for students complete during their reading and bring questions to class In Class Exercises that focus on the areas that students struggled with during their reading and Homework Exercises that can be assigned if students need extra practice with the concepts
