Benchmarking Islamic Finance Mohd Ma'Sum Billah, 2021-07-14 Pricing or benchmarking is a process of evaluating the performance of a financial company's products and services or systems against other businesses considered to be at the top of their field by applying a measurement of best in performance. This book includes contributions from the leading global experts in the field who tackle topics such as whether the Islamic financial system has been dependent on the LIBOR EURIBOR in its benchmarking exercises to date and thus whether it will be affected negatively by the predicted non-existence of the LIBOR EURIBOR from 2021 onwards. They also address the question of whether the Islamic financial system requires benchmarking of its products and services and consider the emergence of Shar'ah justified benchmarking in today's Islamic financial system. Additionally, they look at how benchmarking formulas should be adapted to ensure the satisfaction of customers within the principles of Maqasid al Shar'ah. It takes a legal and institutional approach to the subject which readers will find particularly valuable as there are various forms of Islamic finance institutions that do not conform to established models in the finance industry. Furthermore, there are emerging business models that will benefit from this line of investigation. This book offers a timely analysis of these issues and redresses the existing misconceptions and misinterpretations pertaining to benchmarking in an Islamic finance context and as such provides guidance and strategies for future directions. It will appeal to researchers of Islamic banking finance and insurance as well as practitioners particularly standard setting bodies regulators and policy makers.

The Internet Is Not the Answer Andrew Keen, 2018-09-01 The renowned Internet commentator and author of *How to Fix the Future* exposes the greed, egotism and narcissism that fuels the tech world. Chicago Tribune: The digital revolution has contributed to the world in many positive ways but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer* by longtime Internet skeptic Andrew Keen offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative informed by the work of other writers, reporters and academics as well as his own research and interviews, Keen shows us the tech world's warts and all. Startling and important. *The Internet Is Not the Answer* is a big picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant unforeseen aftershocks. Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture; he is its conscience and must be heard. Po Bronson, 1 New York Times bestselling author.
