TRUE or FALSE. On the space provided before each item, write TRUE if the statement is factual and FALSE if it is erroneous.

1. A columnist is expected to be good at presenting facts as he chooses to write any topic about his column.
2. A column and an editorial are both opinion articles that are products of collaboration of all members of the editorial board.
3. The editor and the publisher are liable to any written topics of the columnist once the article is published.
4. A columnist is allowed to have multiple topics or issues in one column so long as he uses breaks like moustache.
5. In writing a column, the writer is expected to become both authoritative and preachy.
6. Like news, a column needs a vast array of facts on the subject but does NOT need quoted statements anymore.
7. A column also follows the principles of persuasion in showcasing the writer's arguments.
8. Unlike titles of feature stories, the title of one's column should be serious, thus not that catchy.
9. Figures of speech like comparison and alliteration can be used in a feature story but NOT in a column.
10. In column writing, a writer is given a freedom to choose his subject and theme, but is limited on the style he may use.

SYNAPSE STRENGTHENERS

1. Clip three columns of three different school papers. In the absence of different school papers, you may opt to use national dailies or three back issues of your own campus paper. Then, critic the columns by identifying the following :
 - a. Similarity of style
 - b. Lengths of paragraphs

Ram Murty,Brandon Fodden,2019-05-09 Hilbert s tenth problem is one of 23 problems proposed by David Hilbert in 1900 at the International Congress of Mathematicians in Paris These problems gave focus for the exponential development of mathematical thought over the following century The tenth problem asked for a general algorithm to determine if a given Diophantine equation has a solution in integers It was finally resolved in a series of papers written by Julia Robinson Martin Davis Hilary Putnam and finally Yuri Matiyasevich in 1970 They showed that no such algorithm exists This book is an

exposition of this remarkable achievement Often the solution to a famous problem involves formidable background Surprisingly the solution of Hilbert's tenth problem does not What is needed is only some elementary number theory and rudimentary logic In this book the authors present the complete proof along with the romantic history that goes with it Along the way the reader is introduced to Cantor's transfinite numbers axiomatic set theory Turing machines and Gödel's incompleteness theorems Copious exercises are included at the end of each chapter to guide the student gently on this ascent For the advanced student the final chapter highlights recent developments and suggests future directions The book is suitable for undergraduates and graduate students It is essentially self contained
