Developments in Petroleum Engineering 1 R.A. Dawe, D.C. Wilson, 1985-06-27 One of the fundamental aspects of petroleum exploitation and production is that of petroleum engineering ie the assessment and recovery of oil from the various types of oil reservoirs The importance of effective petroleum engineering has increased dramatically due to a number or of varying reasons Firstly recoverable oil reserves should be capable of extended life by application of efficient reservoir depletion methods Secondly the average recovery factor does not appear to have increased over the last three decades Thirdly the behaviour of reservoirs is still unpredictable in spite of the fact that the principles of oil recovery are better understood Finally there has been an enormous growth in the number of computer based analysis techniques available to the engineer These factors taken in conjunction with the fact that many developments have been presented as unpublished papers have highlighted the need for a series of volumes which will give the engineer a starting point for the collection of up to date information This new series of volumes *Developments in Petroleum Engineering* is intended to fill this gap and will contain reviews of recent developments The chapters are written by specialists at a level which summarises the progress but does not necessarily cover every facet and detail of a particular subject Rather they direct the reader to the most useful of the original sources Energy Abstracts for Policy Analysis, 1989 *Resuscitation* Annie Chellel, 2000 This book is split into two sections The first offers a description of the European Resuscitation Council whose guidelines form the core of practice and will look at ethical and legal aspects It also addresses the controversial issue of family attendance at resuscitation attempts and offer an analysis of outcomes Section two presents the new guidelines and algorithms for basic advanced and paediatric life support Key area of nursing practice Based on 1997 European guidelines Handy size and price quick reference Addresses practical and ethical emotional issues *Resources in Education*, 1979 **Occupational Health Nurses and Respiratory Protection** Institute of Medicine, Board on Health Sciences Policy, Committee on the Respiratory Protection Curriculum for Occupational Health Nursing Programs, 2011-11-06 Occupational health nurses OHNs are front line advocates for preventing illness and injury and protecting health in a variety of workplace settings including the areas of agriculture construction health care manufacturing and public safety OHNs need education and training in respiratory protection in order to ensure both their safety and the safety of America s workers At the request of the National Personal Protective Technology Laboratory of the National Institute for Occupational Safety and Health the Institute of Medicine IOM examined existing respiratory protection curricula and made recommendations to improve education and training in respiratory protection for OHNs The IOM finds that current respiratory protection education receives varying amounts of dedicated time and resources and is taught using a variety of approaches Several recommendations are made to
