

ALTEC LANSING

1594B POWER AMPLIFIER

OPERATING INSTRUCTIONS

OPERATION

The ALTEC 1594B Power Amplifier delivers up to 100 watts of output power for all types of sound reinforcement systems. It remains stable with varying conditions of varying line voltages and with all types of loads, including long uncoiled speaker lines having considerable capacitance.

CONTROLS AND INDICATORS

Two operating controls are on the front panel: a VOLUME control and a primary power ON-OFF switch. A pilot indicator is lit when the power is ON.

HIGH-PASS FILTER

A two-section high-pass filter is provided with the 1594B to protect driver loudspeakers from excessive low-frequency power demands. Filter use is indicated when high power output from the amplifier is applied to driver loudspeakers not equipped with protective crossover networks. The 3 dB frequency of the high-pass filter is 400 Hz.

A screwdriver-operated FILTER IN-OUT switch is located on the rear of the chassis (see Figure 1). The switch is placed in the OUT position when the 1594B is shipped from the factory.

ALTEC's Active Distortion Sensing Circuit provides fast-acting protection for the output transistors. Circuit action is immediate and effective at all frequencies within the passband of the amplifier, leaving only that portion of program material that would damage or degrade the output transistors.

ACCESSORIES

A plug-in 15095A or 15035A Line Transformer is available to provide line isolation.

Don. Input sensitivity for full-rated amplifier output is 0.2V rms with the 15095A transformer and 0.8V rms with the 15035A transformer.

The 42526 Shelf Mount Cover is available to enclose the 1594B for shelf use. It fits the 1594B for easy access to front panel controls. The sides and top extend beyond the front panel to prevent accidental changes of control settings. The cover provides easier handling for portability, and is sturdy enough to support lightweight equipment placed on top of it. Four polyethylene feet prevent marring of surfaces. The ALTEC green finish matches the front panel of the 1594B.

INSTALLATION

The 1594B may be installed in a standard 19-inch equipment rack, or in the 42526

Shelf Mount Cover accessory for shelf use. Vertical space required is 7 inches (four rack units).

RACK INSTALLATION

1. Remove four screws securing front panel. Open and lower panel as shown in Figure 2.
2. Install 1594B in equipment rack with appropriate four screws supplied.
3. Close front panel and secure with four screws previously removed.

SHELF INSTALLATION

The 1594B may be shelf mounted as desired after installing the ALTEC 42526 Shelf Mount Cover (order to 42526 installation instructions).

VENTILATION

The 1594B generates minimal heat during normal use. Although the amount of heat is relatively low, the amplifier must be ventilated to prevent an excessive temperature rise. Because transistors are heat sensitive, the 1594B should not be placed adjacent to heat-generating equipment or in areas where ambient temperature exceeds 55°C (131°F).

Figure 1. Rear View of 1594B Power Amplifier

Specifications and components subject to change without notice. Overall performance will be maintained or improved.
