Following the theoretical framework Nida had developed over decades of work on translation and semiotics the two authors offer an easily comprehensible analysis of the complex problems involved in translation After a critical review of the historical development of translation theory in the light of modern information theory they elucidate the most fundamental principles of translation in accordance with the concept of dynamic equivalence The treatment is closely related to actual translation practice and the principles elucidated are applicable to all types of translation though most of the examples analyzed are taken from translations between Chinese and English This new and expanded edition has two main parts Part I is the complete text of the original work as published in the early 1980s Part II consists of six of Professor Jin's more recent essays which provide further insights into the principle of equivalent effect and its applications in literary translation Particular attention is paid to practical procedures and the extremely complex relationship between creative translation and

The Wamira people of Papua New Guinea display what outsiders would describe as an obsession with food Who owns how many pigs how much taro grows in whose garden and who contributes what food at a feast are all questions uppermost in their thoughts Wamirans account for this preoccupation by saying that they suffer from perpetual famine They explain this by means of an elaborate and colorful myth about Tamodukorokoro a monster who would have brought them abundant food but whom in typical Wamiran style of fearing what they desire they chased away In this carefully crafted and beautifully evocative book Kahn who lived with the Wamira people for two and a half years argues that Wamirans famine has in fact little to do with the belly For Wamirans concepts of food and hunger are cultural constructs By means of food they objectify emotions balance relations between men and women communicate rivalries among men and ultimately control the ambivalent desires that they fear would otherwise control them Effectively combining analyses of myths and symbols with analytical accounts of subsistence and ritual behavior Kahn writes with a degree of nuance that takes the reader beyond academic analyses into the experience of the ethnographer and the daily lives of the people with whom she resided
