Álvarez,Margarita Ojeda,2019-05-09 This volume investigates the contemporary fauna that inhabit the Cuatro Ciénegas Basin Divided into 15 chapters it addresses and describes their diversity taxonomic and biogeographic affinities and ecological characteristics The Cuatro Ciénegas Valley is a unique oasis in the south central region of the State of Coahuila part of the Sonoran Desert in Mexico Several clues specially derived from the study of the microbiota suggest a very ancient origin of the valley and its permanence through time This condition had promoted a high level of endemism and led to unique interactions between the resident species *Outrageous Animal Adaptations* Michael J. Rosen,2018-01-01 A fish that walks on land a frog that makes its own sunscreen and an insect that can become invisible Whether to avoid predators to stalk prey or to withstand extreme temperatures Earth s creatures have evolved some outrageous features and tricks to ensure survival For example did you know that the geoduck nope it s not a duck it s a clam can live as long as 160 years And that the aye aye a nocturnal primate uses echolocation and a long spindly finger to find and dig up food Or that in its deep ocean habitat the vampire squid uses bioluminescence to startle predators These are among the many animals that show evolution and

adaptation at work The Dance of Person and Place Thomas M. Norton-Smith, 2010-04-29 Ever since first contact with Europeans American Indian stories about how the world is have been regarded as interesting objects of study but also as childish and savage philosophically curious and ethically monstrous Using the writings of early ethnographers and cultural anthropologists early narratives told or written by Indians and scholarly work by contemporary Native writers and philosophers Shawnee philosopher Thomas Norton Smith develops a rational reconstruction of American Indian philosophy as a dance of person and place He views Native philosophy through the lens of a culturally sophisticated constructivism grounded in the work of contemporary American analytic philosopher Nelson Goodman in which stories or world versions satisfying certain criteria construct actual worlds words make worlds Ultimately Norton Smith argues that the Native stories construct real worlds as robustly as their Western counterparts and in so doing he helps to bridge the chasm between Western and American Indian philosophical traditions
