Animal Man Vol Animal Vs Man:

The Expression of the Emotions in Man and Animals Charles Darwin, 1965-04-15 Darwin's work of 1872 still provides the basis of research in the theory of emotion and expression. Though strides have been made, behavioral scientists still rely on it.

THE SECOND VOLUME, CONTAINING The Parts of Middle APARTMENT OF MAN'S BODY (And Other ANIMALS), With Its DISEASES, CASES, and CURES Samuel Collins, 1685 *The Expression of the Emotions in Man and Animals (Evolutionary Theory)* Charles Darwin, 2021-05-07 *The Expression of the Emotions in Man and Animals* is Charles Darwin's major work of evolutionary theory. The book concerns the biological aspects of emotional life and Darwin explores the animal origins of such human characteristics as the lifting of the eyebrows in moments of surprise and the mental confusion which typically accompanies blushing. Darwin's biological approach links emotions to their origins in animal behavior and allows cultural factors only an auxiliary role in the shaping of expression. This biological emphasis leads to a concentration on six emotional states: happiness, sadness, fear, anger, surprise, and disgust. It also leads to an appreciation of the universal nature of expression with its implication of a single origin for the entire human species, and Darwin points to the importance of emotional communication with children in their psychological development. **Summa Theologiae, Prima**

Pars: Volume 3, Human Beings and God's Governance of Creation, QQ 75-119 Thomas Aquinas, Thomas de Vio Cajetan, 2023-06-23 This book is an introduction to three questions on love according to St Thomas Aquinas. *Summa Theologiae* I II qq 26-28. These three questions reflect on the nature of love: q 26 the causes of love, q 27 and the effects of love, q 28. It is thus an introduction to the entire phenomenon of love, both as a bodily passion and an act of the will. The purpose is to present the Thomistic and broadly scholastic account of human and divine love from a philosophical and theological perspective. It aims to be a theological and philosophical study of the topic, useful both for a graduate professional audience as part of an undergraduate or graduate course and perhaps for the educated reader. The thesis of the book is that, contrary to contemporary conceptions, not all loves are created equal. Some loves perfect us and some loves corrupt us. The worth of a love depends on its object and end. St Thomas thus presents an objective and teleological account of human and divine love that is of philosophical and theological interest. The method is broadly exegetical, presenting a careful reading of the text and supplying the philosophical and theological background which the text of Aquinas assumes. The scope of the work is limited to three questions: ST I II qq 26-28. References to interpretative disputes of Aquinas and references to further resources in the secondary literature will be mostly limited to the footnotes, making the body of the text accessible to more readers. **The Expression of the Emotions in Man and Animals by Charles Darwin - Delphi Classics (Illustrated)**
