2014 Grd 11 Oct Nov Economics P2:

Daily Graphic Ransford Tetteh, 2014-04-09 *The UK Regional-National Economic Problem* Philip McCann, 2016-03-10

In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. *The UK Regional National Economic Problem* brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities. The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government.

The Economics and Law of Public Procurement Annalisa Castelli, Gustavo Piga, Tünde Tátrai, 2024-12-11. Public procurement makes up a significant part of national economies, 10-25% of gross domestic product (GDP) depending on the country. Appropriate laws and regulations are an essential tool to direct the action of procurers towards the public good and avoid corruption and misallocation of resources while at the same time sustaining progress and social goals. The original approach of this book combines juridical, economic and technical expertise to find common terrain and a common language in order to debate the specific issues that affect public administrations across the world that need advancing and modernizing. The book features contributions across four specific themes of interest to the procurer's day to day job in modern public purchasing organizations: preferences and political economy in public procurement, climate change, defence procurement and human rights in public procurement. The aim is to let the new emerging trade offs between competition and sustainability emerge, highlighting at the same time the possible synergies between the relevant policy objectives. The book takes into account sectoral specificities reinforced by recent global events such as wars, natural disasters and populism. The unique format features in each section an interdisciplinary debate between two experts across different disciplines who deliberate and engage one another so as to improve the mutual understanding across disciplines, followed by two additional contributions. This book will be of interest to scholars, researchers and policymakers worldwide.

Structural Racism Stephen Menendian, 2025-06-30

This book explains how racial inequality in the United States is produced and perpetuated and what should be done about it

It develops the elusive concept of structural racism presenting a precise definition that is clear and comprehensible and illustrates how it operates methodically and rigorously

Many other books are long on problems and short on solutions whereas this book develops the key principles that must ground a structural reform agenda and then presents a broad ranging set of interventions organized around ten themes that will reduce racial disparities while expanding opportunity for all

Unlike most books on race which focus on a particular issue or sector this book is comprehensive in its scope encompassing the vital systems that shape racial inequality in contemporary American society from education and public schools to income and wealth disparities to housing and health care to policing and the criminal justice system

As such this book is the ideal text for readers seeking to learn more about structural racial inequality in society how it came to be that way and what we should do about it while deepening our understanding and challenging many misguided or simplistic prevailing notions

In a time of backlash to racial justice and

growing doubts about racial equity initiatives this book is a timely and necessary entry A must read for advocates students policymakers and researchers alike *Global Governance of Civil Aviation Safety* Nilgun Ozgur,2022-09-30 This book indicates the shortcomings of the current international legal system and customary international norms that govern international aviation law to comply with contemporary air transport market realities As the air transport market develops globally the safety regime of civil aviation should also be governed and applied globally In this book the author departs from current international legal norms to examine the emerging legal field of global administrative law Through that lens the possibility of reconstructing the set of legal mechanisms that govern domestic and international administrative interaction in the global field of aviation safety is explored This book demonstrates that a legal system is never complete but always develops in tandem with changing needs i e the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area increasing academic and research interest of practitioners of public international aviation law global administrative law global governance and global aviation safety global air transport market regulations [Yearbook of International Organizations 2014-2015 \(Volume 4\)](#) Union Of International Associations,Union of International Associations,2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations [A Neoliberal Framework for Urban Housing Development in the Global South](#) Sampa Chisumbe,Clinton Ohis Aigbavboa,Erastus Mwanaumo,Wellington Didibhuku Thwala,2024-03-22 A Neoliberal Framework for Urban Housing Development in the Global South highlights the factors which predict urban housing development from developing countries perspective providing a guide for countries in the sub Sahara **Mining in**

Reconsidering Resilience in Education Adeela Ahmed Shafi, Tristan Middleton, Richard Millican, Sian Templeton, 2020-09-03 This book explores the concept of resilience and its significance in responding to a rapid and ever changing globalised world whilst critiquing its buzzword status in contemporary times Drawing on research from a range of educational settings the book demonstrates that the resilience of individuals and their surrounding systems should not be viewed in isolation and that the interplay between individual resilience community resilience and resilient societies is complex and symbiotic On this basis it illustrates that efforts to promote resilience would benefit from a systems approach capable of coping with this complexity Using the ideas of agency and the power of self determinism a development of Bronfenbrenner's bio ecological model is presented to illustrate the complexity of their interplay Existing models of resilience are developed with the book offering the Dynamic Interactive Model of Resilience DIMoR as a way to analyse and support resilience which moves beyond a reductionist descriptive and fashionable presentation of resilience **Understanding**
