Active and Healthy Aging and Quality of Life: Interventions and Outlook for the Future, volume II Shekhar Chauhan, Petra Heidler, David Jean Simon, 2024-09-10 The continuous growth of older populations as a consequence of demographic changes is a huge global challenge The growing proportion of older adults not only burdens the healthcare system specifically in developing countries but also posits a challenge at the household level specifically in nuclear and one person households For societies as a whole to avoid costly and negative effects it is crucial to increase their

knowledge of how to promote good health among older adults so that they can live longer and enjoy a better quality of life. Active aging is the process of optimizing opportunities for health participation and security in order to enhance quality of life as people age. An active and healthy life has remained one of the most important aspirations for all people both young and older adults alike. This ambition has become a genuine possibility for many due to a rising life expectancy among people of diverse attributes across the world. While celebrating longer life and more financial security in later life than ever before, we need to challenge how these aspirations can be sustained through our own behavioral responses and through public policy, institutional reforms and innovations. The challenge is to identify, recommend and promote strategies and interventions that stimulate and sustain the activity independence and health of people of all ages, especially older adults, and in the process, promote the well-being and quality of life of people and make public welfare systems more sustainable. *Science* John Michels (Journalist), 2008

Engaging Curriculum Bill Green, 2017-09-18. Explicitly linking curriculum inquiry to English education via recurring themes of representation, democracy and knowledge, this book is a call for both researchers and practitioners to engage with curriculum explicitly and deliberatively as both a concept and a question. The approach is broadly conceptual and constitutes an exercise in theoretical and philosophical inquiry. While deeply informed by North American debates and developments, this book offers a distinctive counterpoint and a strategically ex-centric perspective, being equally informed by the curriculum scene in Australia as well as the UK and elsewhere. Divided into two sections, this book first addresses matters of general curriculum inquiry, while the second turns more specifically to English teaching and to associated questions of language literacy and literature in L1 education. Green brings the two together through a critical examination of the Australian national

curriculum especially in its implications and challenges for English teaching and with due regard for the project of transnational curriculum inquiry Directory Medical Library Association,1993 Doing Research in Social Work and Social Care Catherine Flynn,Fiona McDermott,2024-12-04 Do you want to understand how best to embrace the challenges surprises and successes of research This book acts as a journey through research to empower you to make the necessary connections between research and professional practice From understanding the concepts of research and gathering data to guiding you in writing it up and achieving positive change this book will give you a confident start with clarity on core concepts and getting it right ethically an insight into diversity in approaches the impact of context and how to overcome problems A better understanding of the realities of social work and social care practice Step by step guidance at each point in the research process Equipped with a wealth of case studies and real world examples to help you put your knowledge into practice this book is the perfect companion for students who want to transition to successful practitioner researchers
