2014 Farm Bill Provisions And Wto Compliance Crs Reports:

Das Instrument der Direktzahlungen in der Agrarpolitik der USA und der EU Justyna Jaroszevska, 2018 Decoupled direct payments were for a long time an important instrument to support agriculture both in the US and in the EU Their elimination in the US in the 2014 reform marks a break in the previous trend for agricultural policies of the US and the EU to become increasingly similar With the help of convergence theory the present study explains the political economy mechanisms behind this new divergence

US Agricultural and Food Policies Gerald D. Toland, Jr., William E. Nganje, Raphael Onyeaghala, 2017-09-18 Policy analysis is a dynamic process of discovery rather than a passive exercise of memorizing facts and conclusions This text provides opportunities to practice the craft of policy analysis by engaging the reader in realistic case studies and problem solving scenarios that require the selection and use of applicable investigative techniques US Agricultural and Food Policies will assist undergraduate students to learn how policy choices impact the overall performance of agricultural and food markets It encourages students to systematically investigate scenarios with appropriate positive and normative tools The book emphasizes the importance of employing critical thinking skills to address the complexities associated with the design and implementation of twenty first century agricultural and food policies Students are asked to suspend their personal opinions and emotions and instead apply research methods that require the careful consideration of both facts and values The opportunities to build these investigative skills are abundant when we consider the diversity of modern agricultural and food policy concerns Featuring case studies and critical thinking exercises throughout and supported by a Companion Website with slides a test bank glossary and web video links this is the ideal textbook for any agricultural policy class

2014 Farm Bill Provisions and WTO Compliance Congressional Research Congressional Research Service, 2014-12-08 The enacted 2014 farm bill Agricultural Act of 2014 P L 113 79 could result in potential compliance issues for U S farm policy with the rules and spending limits for domestic support programs that the United States agreed to as part of the World Trade Organization s WTO s Uruguay Round Agreement on Agriculture AoA In general the act s new farm safety net shifts support away from classification under the WTO s green amber boxes and toward the blue amber boxes indicating a potentially more market distorting U S farm policy regime The 2014 farm bill eliminates many of the support programs of the 2008 farm bill P L 110 246 and replaces them with several new shallow loss programs addressing relatively small shortfalls in farm revenue Agricultural Risk Coverage ARC Supplemental Coverage Option SCO and Stacked Income Protection Plan STAX as well as a revamped counter cyclical price support program Price Loss Coverage PLC that relies on elevated support prices Among the safety net programs only the marketing loan program and the U S sugar program were extended unchanged The sugar program will continue to count for 1 3 billion against the current U S limit of 19 1 billion for non exempt trade distorting amber box outlays The most notable safety net change is the elimination of the 5 billion per year direct payment DP program which was decoupled from producer planting decisions and was notified as a minimally trade

distorting green box outlay DPs are replaced by programs that are partially coupled PLC and ARC or fully coupled SCO and STAX meaning that they could potentially have a significant impact on producer planting decisions depending on market conditions Fully and partially coupled farm programs influence planting decisions both by increasing the overall profitability of farming as low price signals are muted and by changing the relative returns to planting alternative crops Increased profitability tends to increase total planted acreage and output while changes in relative returns influence the share of acreage planted to each crop with consequences that could spill over into international markets Many of the new programs authorized by the 2014 farm bill have yet to be fully implemented thus producer participation is uncertain while potential distortions have yet to be measured and will likely hinge on future market conditions For example under a relatively high market price environment as existed during the 2010 2013 period U S program outlays would be small and would fall within the 19.1 billion U S amber box limit Most studies suggest that for U S program spending to exceed the 19.1 billion limit a combination of worst case events would have to occur for example low market prices generating large simultaneous outlays across multiple programs in addition to the 1.3 billion of implicit costs associated with the sugar program Such a scenario is unlikely although not impossible particularly since outlays under several of the programs including the new dairy program SCO STAX and crop insurance are not subject to any per farm subsidy limit Perhaps more relevant to U S agricultural trade is the concern that because the United States plays such a prominent role in most international markets for agricultural products any distortion resulting from U S policy would be both visible and vulnerable to challenge under WTO rules Furthermore projected outlays under the new 2014 farm bill s shallow loss and counter cyclical price support programs may make it difficult for the United States to agree to future reductions in allowable caps on domestic support expenditures and related de minimis exclusions as envisioned in ongoing WTO multilateral trade negotiations
