Communicating Mobility and Technology Ehren Helmut Pflugfelder, 2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies and their ramifications Thus far few studies in technical communication have explored the development of mobility technologies the immense power that highly structured environmentally significant systems have in the world or the human machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous electric pod car network that ultimately failed Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks Manual of 3D

Echocardiography Eduardo Casas Rojo, Covadonga Fernandez-Golfin, José Luis Zamorano, 2017-03-15 This book is a practical guiding manual to explain critical clinical practice in three dimensional 3D echocardiography The use of this technology has been limited to certain pioneer imaging units but with the advent of lower cost hardware it is spreading and reaching more users that will start to use it often without previous experience or formal academic training This title provides these readers with a full review of the features clinical indications and methodological aspects of 3D echo in a practical how to do it way 3D echocardiography techniques are becoming more diverse as they are applied to transthoracic and transesophageal studies 3D wall motion tracking fusion of echocardiographic and fluoroscopy navigation fusion of wall motion tracking and coronary tomography All these aspects are described and explained deeply in this book Intelligent Software Methodologies, Tools and Techniques Hamido Fujita, Ali Selamat, 2015-05-06 This book constitutes the best papers selection from the proceedings of the 13th International Conference on Intelligent Software Methodologies Tools and Techniques SoMeT 2014 held in Langkawi Malaysia in September 2014 The 27 full papers presented were carefully reviewed thoroughly revised or enlarged and selected as best papers from the 79 published proceedings papers which had originally been selected from 192 submissions The papers are organized in topical sections on artificial intelligence techniques in software engineering requirement engineering high assurance system intelligent software systems design creative and arts in interactive software design software methodologies for reliable software design software quality and assessment for business enterprise software analysis and performance model software applications systems *Scientific and Technical Aerospace Reports*, 1992-06

Equipment Intelligent Operation and Maintenance Ruqiang Yan, Jing Lin, 2025-03-07 The proceedings of the First International Conference on Equipment Intelligent Operation and Maintenance ICEIOM 2023 offer invaluable insights into the processes that ensure safe and reliable operation of equipment and guarantee the improvement of product life cycles The book touches upon a wide array of topics including equipment condition monitoring fault diagnosis and remaining useful life prediction With special emphasis on the integration of big data and machine learning the papers contained in this publication highlight how these technologies make the equipment operation process highly automated and ingenious Intelligent operation and maintenance is set to act as the driving force behind a new generation of smart manufacturing and equipment upgradation and promote demand for intelligent product services and management This is a highly beneficial guide to students researchers working professionals and enthusiasts who wish to stay updated on innovative research contributions and practical applications of state of the art technologies in equipment operation and maintenance

Handbook of Research on Opinion Mining and Text Analytics on Literary Works and Social Media Keikhosrokiani, Pantea, Pourya Asl, Moussa, 2022-02-18 Opinion mining and text analytics are used widely across numerous disciplines and fields in today s society to provide insight into people s thoughts feelings and stances This data is incredibly valuable and can be utilized for a range of purposes As such an in depth look into how opinion mining and text analytics correlate with social media and literature is necessary to better understand audiences The Handbook of Research on Opinion Mining and Text Analytics on Literary Works and Social Media introduces the use of artificial intelligence and big data analytics applied to opinion mining and text analytics on literary works and social media It also focuses on theories methods and approaches in which data analysis techniques can be used to analyze data to provide a meaningful pattern Covering a wide range of topics such as sentiment analysis and stance detection this publication is ideal for lecturers researchers academicians practitioners and students

Proceedings of SAI Intelligent Systems Conference (IntelliSys) 2016 Yaxin Bi, Supriya Kapoor, Rahul Bhatia, 2017-08-19 These proceedings of the SAI Intelligent Systems Conference 2016 IntelliSys 2016 offer a remarkable collection of chapters on a wide range of topics in intelligent systems artificial intelligence and their applications to the real world Authors hailing from 56 countries on 5 continents submitted 404 papers to the conference attesting to the global importance of the conference s themes After being reviewed 222 papers were accepted for presentation and 168 were ultimately selected for these proceedings Each has been reviewed on the basis of its originality novelty and rigorousness The papers not only present state of the art methods and valuable experience from researchers in the related research areas they also outline the field s future development

Human-Technology Interaction Carsten Röcker, Sebastian Büttner, 2022-12-13 Digitalization and automation are leading to fundamental changes in the industrial landscape In the German speaking countries this development is often summarized under the term Industry 4 0

Simultaneously interaction technologies have made huge developments in the last decades The use of mobile devices and touch screens is ubiquitous augmented and virtual reality technologies have made their way into the market and new interaction concepts have become established While new interaction technologies offer new possibilities for organizing or executing work in the context of Industry 4 0 the transformation of industrial processes also creates a need for new work practices This book sheds light on the interplay of Industry 4 0 and new interaction technologies It presents selected research articles on the topic of Human Technology Interaction in the context of Industry 4 0 Researchers from various disciplines present the current state of research with regard to future interactions with production environments to develop a common vision of how to design future interactions in the industrial domain In this context various topics are covered a detailed overview on assistive systems for supporting manual work is given including technological and design aspects as well as implementation strategies Industrial use cases for extended reality XR technologies such as augmented and virtual reality AR and VR are presented also covering aspects of how to author content in XR environments The role of new work practices is examined for example by presenting concepts of gamification and human machine teamwork for supporting well being Finally topics of trust and technology acceptance are discussed in the context of Industry 4 0 Given this broad perspective a vision is sketched of how to design future human technology interactions in a way that realizes their full technical and human potential

A dynamic interplay between membranes and the cytoskeleton critical for cell development and signaling Clément Thomas, Christopher J Staiger, 2014-10-23 Various cellular processes underlying plant development and response to environmental cues rely on a dynamic interplay between membranes and the cytoskeleton e g vesicle and organelle trafficking endocytosis exocytosis and signal transduction In recent years significant progress in the understanding of such interplay has been achieved and several critical links between membranes and the cytoskeleton have been characterized As an example recent work has clarified how auxin promotes the reorganization of cortical actin filaments by the activation of Rho GTPase pathways and how such reorganization in turn locally modifies endocytosis and or exocytosis and directs asymmetric distribution of PIN family of auxin transporters Another recent achievement is the characterization of the Rho

and microtubule driven mechanism by which the cell wall architecture is established In particular the elegant work by Oda and Fukuda Science 337 p 1333 2012 provides evidence that secondary wall patterning in xylem vessel primarily relies on two processes a local activation of the plant Rho GTPase ROP11 and a mutual MIDD1 mediated inhibitory interaction between active ROP domains and cortical microtubules Additional examples include recent genetic evidence that microtubule and actin filament interacting regulatory proteins such as MAP65 1 and capping protein function as transducers of membrane lipid signaling into changes in cytoskeleton dynamics and organization This Research Topic aims at collecting a comprehensive set of articles dealing with cellular processes involving membrane cytoskeleton interactions Its scope extends beyond the specific fields defined by the above examples and includes intracellular trafficking host pathogen interactions response to biotic and abiotic stresses and hormonal regulation of growth We hope that this Research Topic will also highlight critical questions that need to be addressed in the future We welcomed Original Research Articles Technical Methodological Advances e g analysis of cytoskeleton dynamics close to membranes Reviews and Mini Reviews that can expand our understanding of how and why membranes and the cytoskeleton interact

Encyclopedia of Ocean Engineering
 Weicheng Cui, Shixiao Fu, Zhiqiang Hu, 2022-06-29 This encyclopedia adopts a wider definition for the concept of ocean engineering Specifically it includes 1 offshore engineering fixed and floating offshore oil and gas platforms pipelines and risers cables and moorings buoy technology foundation engineering ocean mining marine and offshore renewable energy aquaculture engineering and subsea engineering 2 naval architecture ship and special marine vehicle design intact and damaged stability technology for energy efficiency and green shipping ship production technology decommissioning and recycling 3 polar and Arctic Engineering ice mechanics ice structure interaction polar operations polar design environmental protection 4 underwater technologies AUV ROV design AUV ROV hydrodynamics maneuvering and control and underwater specific communicating and sensing systems for AUV ROVs It summarizes the A Z of the background and application knowledge of ocean engineering for use by ocean scientists and ocean engineers as well as nonspecialists such as engineers and scientists from all disciplines economists students and politicians Ocean engineering theories ocean devices and equipment ocean design and operation technologies are described by international experts many from industry and each entry offers an introduction and references for further study making current technology and operating practices available for future generations to learn from The book also furthers our understanding of the current state of the art leading to new and more efficient technologies with breakthroughs from new theory and materials As the land resources approach the exploitation limit ocean resources are becoming the next choice for the sustainable development As such ocean engineering is vital in the 21st century
