GIS Integrated Teaching on Secondary School Underachieving Students' Geography Learning Goals Soon Singh A/L Bikar Singh,2021-06-28 Recent studies show

that the number of students who select to study Geography in Malaysian secondary schools and their level of achievement in the subject has decreased. The main factor is lack of motivation. Over multiple decades a large and growing body of literature has indicated that ICT enhances students' motivation to learn and their learning outcome. The studies demonstrate that the use of ICT in teaching activities provides more fun in an authentic learning environment and increases learning autonomy, interaction and collaboration. It is therefore a rich opportunity for motivating students to study. In addition, despite an increased interest among scholars to investigate the impact of ICT integrated Geography teaching on students' motivation and achievement, none have investigated the effects of GIS as a new technological teaching tool on students' Geography learning goals and their learning outcomes. The idea for this book originated from the author's PhD study to examine the effects of GIS based instruction on secondary school student Geography learning goals and their learning outcomes. This book is highly beneficial for Geography teachers to use multiple teaching methods and pedagogies in a GIS integrated teaching environment to cultivate underachieving students' mastery, goal performance, approach goal and learning, and to decrease avoidance behaviour in learning the subject. Although GIS is widely used in Malaysia, it has not been embraced by the Malaysian education system and is absent from the Geography curriculums in the primary and secondary school contexts. Hence, writing of this book will also help the Curriculum Development Centre and Ministry of Education Malaysia develop a GIS based teaching module to enhance the learning motivation of Geography and improve the student level of achievement.

Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
