

Essay questions in exams

Writing an essay in an exam is similar in many ways to writing an essay for an assignment: it needs to be clearly structured, your ideas need to be linked and supported by evidence.

Read the question through carefully to make sure you are answering what has been asked. Missing one part of a question can cost you a lot of marks.

Make a quick plan of the points you want to include in your answer.

Use essay structure: introduction, points, conclusion. But, if you run out of time, it can be a good idea to write notes.

Get right to the point from the beginning. Use the words from the question to write your first sentence.
For example:

Question: What do you think is the most important intercultural communication issue in New Zealand?

First sentence: At present in New Zealand the most important intercultural communication issue is....

Remember to include one idea per paragraph and to begin each paragraph with a clear topic sentence.

Make sure your writing is legible.

Grammar, punctuation and spelling are not as important as in an assignment but should still be of a good standard.

Because We are Standing on the Edge** Stephen Tierney, 2016-10-17 Stephen Tierney has spent thirty years working in schools twenty nine of those in different leadership positions In Liminal Leadership he suggests that the education system is currently at a threshold and it may be one in which the teaching profession is diminished or augmented Using an honest and personal account of Stephen s own journey as a framework Liminal Leadership empowers current and prospective school leaders at all levels to scrutinise polish and advance their skills to build enriching aspirational and ultimately fulfilling cultures within which to work **Knowledge and Networking** Anton Oleinik, 2014-05-31 Success and career growth in academic life depend upon reaching and influencing the widest audience possible To do so scientists strive to develop personalized trust They do so by establishing a large number of connections through networking and also through the strength of their arguments and the validity and reliability of their research To secure increasingly rare tenure positions and achieve salary increases promotions and recognition scholars place themselves on a continuum of priorities ranging from total emphasis on networking to complete focus on advancing knowledge trying to find some middle ground between the two extremes Anton Oleinik argues that when scholars prioritize networking science reproduces features of a small world in which personal connections prevail Who knows whom matters more than who knows what In this scenario one s status derives more from affiliation with a specific group of scholars or a particular university than from contributing to advancing knowledge Acknowledging that it would be a mistake to consider networking the main source of evils in science Oleinik instead criticizes the decisions scholars make while struggling to find that middle ground between networking and advancing knowledge and managing conflicts between these priorities The fierce competition for increasingly scarce research funds and the difficulty of finding jobs in academia underlines the growing importance of the choices made by an

academic Though Oleinik focuses particularly on the social sciences his ideas are just as relevant to other disciplinary areas

The Education We Need for a Future We Can't Predict Thomas Hatch, Jordan Corson, Sarah Gerth van den Berg, 2021-01-19 Improve Schools and Transform Education In order for educational systems to change we must reevaluate deep seated beliefs about learning teaching schooling and race that perpetuate inequitable opportunities and outcomes Hatch Corson and Gerth van den Berg challenge the narrative when it comes to the grammar of schooling or the conventional structures practices and beliefs that define educational experiences for so many children to cast a new vision of what school could be The book addresses current systemic problems and solutions as it Highlights global examples of successful school change Describes strategies that improve educational opportunities and performance Explores promising approaches in developing new learning opportunities Outlines conditions for supporting wide scale educational improvement This provocative book approaches education reform by highlighting what works while also demonstrating what can be accomplished if we redefine conventional schools We can make the schools we have more efficient more effective and more equitable all while creating powerful opportunities to support all aspects of students development You won t find a better book on system change in education than this one We learn why schools don t change how they can improve what it takes to change a system and in the final analysis the possibilities of system change Above all The Education We Need renders complexity into clarity as the writing is so clear and compelling A powerful read on a topic of utmost importance Michael Fullan Professor Emeritus OISE Universtiy of Toronto I cannot recommend this book highly enough Tom tackles long standing and emerging educational issues in new ways with an impressive understanding of the challenging complexities but also feasible possibilities for ensuring excellence and equity for all students Carol Campbell Associate Professor Ontario Institute for Studies in Education University of Toronto

Who Wrote This? Naomi S. Baron,2023-09-12 Would you read this book if a computer wrote it Would you even know And why would it matter Today s eerily impressive artificial intelligence writing tools present us with a crucial challenge As writers do we unthinkingly adopt AI s time saving advantages or do we stop to weigh what we gain and lose when heeding its siren call To understand how AI is redefining what it means to write and think linguist and educator Naomi S Baron leads us on a journey connecting the dots between human literacy and today s technology From nineteenth century lessons in composition to mathematician Alan Turing s work creating a machine for deciphering war time messages to contemporary engines like ChatGPT Baron gives readers a spirited overview of the emergence of both literacy and AI and a glimpse of their possible future As the technology becomes increasingly sophisticated and fluent it s tempting to take the easy way out and let AI do the work for us Baron cautions that such efficiency isn t always in our interest As AI plies us with suggestions or full blown text we risk losing not just our technical skills but the power of writing as a springboard for personal reflection and unique expression Funny informed and conversational Who Wrote This urges us as individuals and as communities to make conscious choices about the extent to which we collaborate with AI The technology is here to stay Baron shows us how to work with AI and how to spot where it risks diminishing the valuable cognitive and social benefits of being literate
