Positive Youth Development, Mental Health, and Psychological Well-Being in Diverse Youth Nora Wiium, Laura Ferrer-Wreder, Jennifer E. Lansford, Lene Arnett Jensen, 2023-06-15 In this Research Topic our aim is to examine how personal resources related to competencies skills and self perception as well as environmental contextual and relational features of the social contexts of diverse youth directly or indirectly are important to mental health and psychological well being As previous research on young people has mainly focused on youth's weaknesses rather than their strengths our use of Positive Youth Development PYD in working with culturally diverse youth and their well being in this Research Topic is novel We invite contributions from researchers that were initially presented their papers in a meeting that was held by research partners of the Cross National Project on Positive Youth Development CN PYD and who represent an international and multidisciplinary panel of experts on PYD The CN PYD was initiated in 2014 at the University of Bergen and has an ongoing data collection that involves approximately 10 000 minority and majority youth and emerging adults ages 16 to 29 living in Africa Asia Australia Europe New Zealand and South America CN PYD uses a strengths based approach to the conceptualization of youth as resources and agentic which is in opposition to the view of the developmental period of adolescence as being a period inherently fraught with problems and risks The goal of the cross national project is to assess personal strengths and contextual resources considering how these resources come together to facilitate youth thriving and to document how young people make positive and valued contributions to themselves and others We also advance research on the complex interplay between personal and contextual

resources and their connections with risk behaviors and problems in essence taking a perspective of the whole child both in terms of strengths and problems

Let's face it weak rivets notwithstanding the Titanic wouldn't have sunk if the iceberg had been spotted in time And let's face it the CCSS won't be classroom worthy unless practitioners chart our course Depend on Michael Smith Deborah Appleman and Jeff Wilhelm to help you navigate through some potentially treacherous waters Uncommon Core puts us on high alert about some outright dangerous misunderstandings looming around so called standards aligned instruction then shows us how to steer past them all in service of meeting the real intent of the Common Core Smith Appleman and Wilhelm counter with teaching suggestions that are true to the research and true to our students including how Reader based approaches can complement text based ones Prereading activities can help students meet the strategic and conceptual demands texts place on them Strategy instruction can result in a careful and critical analysis of individual texts while providing transferable understandings Inquiry units around essential questions can generate meaningful conversation and higher order thinking about those texts Selection criteria that consider interpretive complexity can take us so much farther than those that consider textual complexity alone Given the number of strategies lesson ideas and activities in the book Uncommon Core is really less about the standards and more about timeless excellent teaching and how to use it like never before to meet the Core ideals Let's put instruction where it belongs back in the hands of the experts Finally A book with more light than heat on the issue of standards and their implications for learning

Cancer Metabolism: Molecular Targeting and Implications for Therapy Shanmugasundaram Ganapathy-Kanniappan, 2017-11-03 Development of an effective anticancer therapeutic necessitates the selection of cancer related or cancer specific pathways or molecules that are sensitive to intervention Several such critical yet sensitive molecular targets have been recognized and their specific antagonists or inhibitors validated as potential therapeutics in preclinical models Yet majority of anticancer principles or therapeutics show limited success in the clinical translation Thus the need for the development of an effective therapeutic strategy persists Altered energy metabolism in cancer is one of the earliest known biochemical phenotypes which dates back to the early 20th century The German scientist Otto Warburg and his team Warburg Wind Negelein 1926 Warburg Wind Negelein 1927 provided the first evidence that the glucose metabolism of cancer cells diverge from normal cells This phenomenal discovery on deregulated glucose metabolism or cellular bioenergetics is frequently witnessed in majority of solid malignancies Currently the altered glucose metabolism is used in the clinical diagnosis of cancer through positron

emission tomography PET imaging Thus the deregulated bioenergetics is a clinically relevant metabolic signature of cancer cells hence recognized as one of the hallmarks of cancer Hanahan and Weinberg 2011 Accumulating data unequivocally demonstrate that besides cellular bioenergetics cancer metabolism facilitates several cancer related processes including metastasis therapeutic resistance and so on Recent reports also demonstrate the oncogenic regulation of glucose metabolism e g glycolysis indicating a functional link between neoplastic growth and cancer metabolism Thus cancer metabolism which is already exploited in cancer diagnosis remains an attractive target for therapeutic intervention as well The Frontiers in Oncology Research Topic Cancer Metabolism Molecular Targeting and Implications for Therapy emphasizes on recent advances in our understanding of metabolic reprogramming in cancer and the recognition of key molecules for therapeutic targeting Besides the topic also deliberates the implications of metabolic targeting beyond the energy metabolism of cancer The research topic integrates a series of reviews mini reviews and original research articles to share current perspectives on cancer metabolism and to stimulate an open forum to discuss potential challenges and future directions of research necessary to develop effective anticancer strategies Acknowledgment I sincerely thank the Frontiers for providing the opportunity and constant support throughout the process of this research topic and eBook production I gratefully acknowledge all the authors for their valuable contributions Finally I would like to thank my brother Saravana Kumar G K whose personal sacrifices and unflinching encouragement made my career in science possible References Hanahan D Weinberg RA 2011 Hallmarks of cancer The next generation Cell 144 5 646 74 Warburg O Wind F Negelein E 1926 ber den stoffwechsel der tumoren in k rper Klinische Wochenschrift 5 829 32 Warburg O Wind F Negelein E 1927 The metabolism of tumors in the body J Gen Physiol 8 6 519 30 Environmental Science , Resources in Education ,1992-10 **Sleep in Medical and Neurologic Disorders, An Issue of Sleep Medicine Clinics** Flavia B.
