International Organizations 2013-2014 (Volumes 1a-1b) Union Of International Associations,Union of International Associations,2013-06-21 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events The Routledge Handbook of Property, Law and Society Nicole Graham,Margaret Davies,Lee

Godden,2022-11-14 This handbook brings together diverse perspectives major topics and multiple approaches to one of the biggest legal institutions in society property Property touches on many fundamental human questions It involves decisions about power economy morality work and ecology It also involves ideas about where humans fit in the world and how humans relate to more than human life This book will ask in myriad ways such questions as what property means what kinds of property there are what is and should be the relationship between owned and owner and what is the impact of different forms of property on life in this world Drawing on a range of socio legal and empirical methodologies renowned scholars and

rising stars in property from around the world present current issues and map future directions in research Coming from the place of law but reaching out through cognate disciplines this handbook provides a comprehensive and accessible survey of current research at the interface of property society and the environment This handbook will appeal to students and researchers across a range of disciplines including law sociology geography history and economics

Property Rights in Outer Space Matthew Johnson, 2024-05-28 This book explores the role of private mining rights in the utopian imaginary of space colonisation It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier Written in an engaging style the book investigates a novel case study in the history of capitalism and the commons the emergence of a nascent space mining industry undergirded by a contentious legislative framework In 2015 the US passed laws that would recognise the claims of US corporations to own and sell space resources This unilateral act of pre emptive law making would appear to contravene the terms of the UN Outer Space Treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation Using this central dynamic between privately held mining rights and outer space as a global commons Matthew Johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the terrain of political history such as the tensions between states and markets public law and private power the commons and exclusive property The emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of Earth and space This book is compelling reading for anyone interested in the social study of space law economics technology politics and property rights

Tunnel Visions Michael Riordan, Lilian Hodgeson, Arianne W. Kolb, 2015-11-20 A detailed and engaging account of the development of the superconducting supercollider one of the largest scientific undertakings in the United States Journal of American History Starting in the 1950s US physicists dominated the search for elementary particles aided by the association of this research with national security they held this position for decades In an effort to maintain their hegemony and track down the elusive Higgs boson they convinced President Reagan and Congress to support construction of the multibillion dollar Superconducting Super Collider project in Texas the largest basic science project ever attempted But after the Cold War ended and the estimated SSC cost surpassed ten billion dollars Congress terminated the project in October 1993 Drawing on extensive archival research contemporaneous press accounts and over one hundred interviews with scientists engineers government officials and others involved Tunnel Visions tells the riveting story of the aborted SSC project The authors examine the complex interrelated causes for its demise including problems of large project management continuing cost

overruns and lack of foreign contributions In doing so they ask whether Big Science has become too large and expensive including whether academic scientists and their government overseers can effectively manage such an enormous undertaking Focusing on the scientific technical and political conflicts that led to delays ever rising costs and eventually the SSC s cancelation by Congress Tunnel Visions is a true techno thriller Burton Richter winner of the Nobel Prize in Physics Most good science stories are tales of discovery and success but failure can be just as riveting Here two historians and an archivist describe the greatest particle physics experiment that never was Scientific American *Environmental Change in the Lake Tahoe Basin* Robert N. Coats,Sudeep Chandra,Alan Heyvaert,Charles R. Goldman,S. Geoffrey Schladow,2025-11-18 The Lake Tahoe Basin is both a natural treasure and a complex case study in environmental management Environmental Change in the Lake Tahoe Basin offers a comprehensive assessment of the region s environmental history current conditions and future challenges providing lessons in how science based policies can drive effective stewardship in high value high conflict landscapes For over a century scientific research and management efforts have aimed to mitigate the impacts of logging mining pollution and invasive species while balancing urban development tourism and ecological preservation on the Lake The book explores these challenges through a multidisciplinary lens integrating environmental science policy analysis and case studies of both successful and failed management strategies Written by experts who have played direct roles in key scientific discoveries and policy decisions the book also examines the influence of environmental organizations and litigation in shaping conservation efforts At its core the authors argue that the Tahoe Basin serves as a model for science driven land and water stewardship The book evaluates long term monitoring programs offering actionable recommendations for improving environmental oversight and resource management Combining scientific analysis with accessible language Environmental Change in the Lake Tahoe Basin serves as an up to date review of the region s environmental challenges providing an essential guide for scientists resource managers and policymakers The authors will donate all royalties from the sale of this volume to the Union of Concerned Scientist www.ucs.org University in the 21st Century Lisa-Marie Geberth,Lisa-Teresa Woller,2023-04-01 University has changed dramatically over the last decades From the spirit of Humboldt that science in itself is the greatest motivator to study and do research we experience a shift towards neoliberalism Studying became part of something one needs to do to compete on a competitive job market Research gets more and more influenced by interests of those financing research funds Digitalization changed the way people interact in a university setting This book shows different views regarding university from being a student becoming an alumnus and then maybe a teacher challenging views on grading and exams to problematic patriarchal structures and problems with creating a new study program Students alumni researcher and lecturers were invited to join this volume and give unique insights into post university life **The Oxford Handbook of the Science of Science Communication** Kathleen Hall Jamieson,Dan M. Kahan,Dietram Scheufele,2017 On topics from genetic engineering and mad cow disease to vaccination and climate change

this Handbook draws on the insights of 57 leading science of science communication scholars who explore what social scientists know about how citizens come to understand and act on what is known by science **CryptoSchool** Joachim von zur Gathen, 2015-11-20 This book offers an introduction to cryptology the science that makes secure communications possible and addresses its two complementary aspects cryptography the art of making secure building blocks and cryptanalysis the art of breaking them The text describes some of the most important systems in detail including AES RSA group based and lattice based cryptography signatures hash functions random generation and more providing detailed underpinnings for most of them With regard to cryptanalysis it presents a number of basic tools such as the differential and linear methods and lattice attacks This text based on lecture notes from the author's many courses on the art of cryptography consists of two interlinked parts The first modern part explains some of the basic systems used today and some attacks on them However a text on cryptology would not be complete without describing its rich and fascinating history As such the colorfully illustrated historical part interspersed throughout the text highlights selected inventions and episodes providing a glimpse into the past of cryptology The first sections of this book can be used as a textbook for an introductory course to computer science or mathematics students Other sections are suitable for advanced undergraduate or graduate courses Many exercises are included The emphasis is on providing reasonably complete explanation of the background for some selected systems

Biopolitics of the More-Than-Human Joseph Pugliese, 2020-10-23 In Biopolitics of the More Than Human Joseph Pugliese examines the concept of the biopolitical through a nonanthropocentric lens arguing that more than human entities from soil and orchards to animals and water are actors and agents in their own right with legitimate claims to justice Examining occupied Palestine Guantanamo and sites of US drone strikes in Afghanistan Pakistan Somalia and Yemen Pugliese challenges notions of human exceptionalism by arguing that more than human victims of war and colonialism are entangled with and subject to the same violent biopolitical regimes as humans He also draws on Indigenous epistemologies that invest more than human entities with judicial standing to argue for an ethico legal framework that will enable the realization of ecological justice Bringing the more than human world into the purview of justice Pugliese makes visible the ecological effects of human war that would otherwise remain outside the domains of biopolitics and law The Wiley Handbook of Human Computer Interaction Set Kent Norman, Jurek Kirakowski, 2017-12-28 In der Vergangenheit war die Mensch Computer Interaktion Human Computer Interaction das Privileg einiger weniger Heute ist Computertechnologie weit verbreitet allgegenwärtig und global Arbeiten und Lernen erfolgen über den Computer Private und kommerzielle Systeme arbeiten computergestützt Das Gesundheitswesen wird neu erfunden Navigation erfolgt interaktiv Unterhaltung kommt aus dem Computer Als Antwort auf immer leistungsfähigere Systeme sind im Bereich der Mensch Computer Interaktion immer ausgeklügelte Theorien und Methodiken entstanden The Wiley Handbook of Human Computer Interaction bietet einen Überblick über all diese Entwicklungen und untersucht die vielen verschiedenen Aspekte der Mensch Computer Interaktion und

Malcolm Gladwell R E M Espresso Party Notebooks, English Virtuosi, and Early Modern Science Richard Yeo,2014-03-01

In Notebooks English Virtuosi and Early Modern Science Richard Yeo interprets a relatively unexplored set of primary archival sources the notes and notebooks of some of the leading figures of the Scientific Revolution Notebooks were important to several key members of the Royal Society of London including Robert Boyle John Evelyn Robert Hooke John Locke and others who drew on Renaissance humanist techniques of excerpting from texts to build storehouses of proverbs maxims quotations and other material in personal notebooks or commonplace books Yeo shows that these men appreciated the value of their own notes both as powerful tools for personal recollection and following Francis Bacon as a system of precise record keeping from which they could retrieve large quantities of detailed information for collaboration The virtuosi of the seventeenth century were also able to reach beyond Bacon and the humanists drawing inspiration from the ancient Hippocratic medical tradition and its emphasis on the gradual accumulation of information over time By reflecting on the interaction of memory notebooks and other records Yeo argues the English virtuosi shaped an ethos of long term empirical scientific inquiry

Persisting Pandemics Powel H. Kazanjian,2024-11-15 Persisting Pandemics explores the history of syphilis and AIDS to provide insights into the limits of biomedicine and our experience with epidemics today Novel therapies developed for syphilis and AIDS became renowned in the medical field and the broader public sphere as exemplars of biomedical innovations Public health campaigns based on these spectacular biomedical advances however have repeatedly fallen short of their goals to eliminate syphilis and AIDS in the population The diseases epitomize the power of innovative biomedical therapies for the individual while unveiling limitations of scientific medicine in the domain of public health The need for a public health approach to address mistrust in science government indifference and racial inequalities is relevant for strategies to eliminate COVID 19 today Persisting Pandemics argues that campaigns to eliminate these diseases have not succeeded because they have not adequately addressed how diseases like AIDS syphilis and COVID spread unevenly in populations according to race ethnicity and geographic location Despite the expectation of public health officials that medical advances would render epidemics obsolete new diseases continue to emerge and spread regardless of efforts to eliminate them Medical doctor and historian Powel H Kazanjian concludes that narratives of syphilis AIDS and COVID unlike smallpox do not contain a discrete ending at least not within the timelines specified by their elimination campaigns Instead they will be a continued part of our existence

Redesigning the Global Seed Commons Christine Frison,2018-11-08 There is much current controversy over whether the rights to seeds or plant genetic resources should be owned by the private sector or be common property This book addresses the legal and policy aspects of the multilateral seed management regime First it

studies in detail the International Treaty on Plant Genetic Resources for Food and Agriculture the Treaty in order to understand and identify its dysfunctions Second it proposes solutions using recent developments of the theory of the commons to improve the collective seed management system of the Treaty a necessary condition for its member states to reach the overall food security and sustainable agriculture goals Redesigning the Global Seed Commons provides a significant contribution to the current political and academic debates on agrobiodiversity law and governance and on food security and food sovereignty by analyzing key issues under the Treaty that affect the design and implementation of regulatory instruments managing seeds as a commons It also examines the practical legal political and economic problems encountered in the attempt to implement these obligations in contemporary settings In particular it considers how to improve the Treaty implementation by proposing ways for Contracting Parties to better reach the Treaty s objectives taking a holistic view of the human seed ecosystem Following the tenth anniversary of the functioning the Treaty s multilateral system of access and benefit sharing which is currently under review by its Contracting Parties this book is well timed to examine recent developments in the field and guide the current review process to design a truly Global Seed Commons **Study**
