and cold war legacy of internationalism demonstrates that territorial and scientific dimensions interlocked the moment the Siberian Branch of the Soviet Academy of Sciences was created in 1957 Drawing on a wide range of previously unexplored archives Soviet SCI_BERIA focuses on how the post Stalinist Siberia was redefined and represented through the ideal of rational development the late socialist innovation practices and the relationship between experts and the state It offers a fresh insight into the transition from Soviet to post Soviet Akademgorodok In doing so Tatarchenko not only fosters a conversation between history area studies and science studies but also sheds new light on Soviet modernity and the limits of its transformative projects
