Precision-guided Munitions and Human Suffering in War James E. Hickey, 2016-04-08 James Hickey proceeds from the premise that throughout history humans have demonstrated a proclivity for using violence against one another as a means to achieve an end means enabled in many respects by the technologies available at the time Advancing technology has often been a prime enabler of ever increasing levels of violence and attendant human suffering At a few junctures in history however certain technologies have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering Today precision guided munitions PGMs with their high degree of discrimination and accuracy again hold such promise This book seeks to answer the question Do PGMs mitigate suffering in war and have these weapons changed the way decisions regarding war and peace have been made Answering this question helps us understand possible shifts in emphasis in modern warfare both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict This book will help students of ethics just war and military history and senior military and civilian leaders to understand the possible outcomes and wider implications of their strategic choices to use such technology

Iran and Nuclear Weapons Saira Khan, 2009-09-25 This book investigates what is driving Iran s nuclear weapons programme in a less hostile regional environment using a theory of protracted conflicts to explicate proliferation Iran s nuclear weapons program has alarmed the international community since the 1990s but has come to the forefront of international security concerns since 2000 This book argues that Iran s hostility with the United States remains the major causal factor for its proliferation activities With the US administration pursuing aggressive foreign policies towards Iran since 2000 the latter s security threat intensified A society that is split on many important domestic issues remained united on the issue of nuclear weapons acquisition after the US war in Iraq Consequently Iran became determined in its drive to acquire nuclear weapons and boldly announced its decision to enrich uranium leaving the US in no doubt about its nuclear status This book underscores the importance of protracted conflicts in

proliferation decisions and underpinning this is the assumption that non proliferation may be achieved through the termination of intractable conflicts The aims of this work are to demonstrate that a state s decision to acquire nuclear weapons depends largely on its engagement in protracted conflicts which shows not only that the presence of nuclear rivals intensifies the nuclear ambition but also that non nuclear status of rival states can promote non proliferation incentives in conflicting states inclined to proliferate This study will be of great interest to students of Iran Middle Eastern politics nuclear proliferation and international relations theory Saira Khan is a Research Associate in the McGill University of Montreal Joint Research Group in International Security REGIS Transnational America Inderpal Grewal,2005-06-28 A study of South Asian Americans which views both their identity and that of America as constructed transnationally between the U S and India War and Peace in Qajar Persia Roxane Farmanfarmanian,2008-01-30 With new and existing evidence being reconsidered this edited collection takes a multidisciplinary approach to discussing the Qajar system within the context of the wars that engulfed it and the periods of peace that ensued It throws new light on the decision making processes the restraints on action and the political exigencies at play during the Qajar years A New Model of Political Reasoning Kanzhen Li,2021-02-16 Why politics and international relations seem to be driven by power strategies in some conditions but seem to be attached to values beliefs in other situations Based on findings in political psychology and international relations the book builds a new political reasoning model a two layered motivation heuristic complex The model grasps the internal mechanism that drives the co existent and dynamic relationship between material and ideational considerations in making political choices phenomena diverse and evolving across situations and periods Applied to the case of China and human rights the model helps understand several questions that attract those who are interested in the topic e g the roots and contents of strategic and conceptual factors that continuously influence China s human rights idea policies if why and how the strategy ideational relationships in such idea policies evolve across periods and the role that China s national security condition and external pressure play during such evolving relationships The Marines, Counterinsurgency, and Strategic Culture Jeannie L. Johnson,2018 The US Marine Corps has traditionally been one of the most innovative branches of the US military but even it has struggled to learn and retain lessons from past counterinsurgency wars Jeannie L Johnson looks at the clash between strategic culture and organizational learning through the US Marine Corps s long experience with counterinsurgency She first undertakes a fascinating examination of what makes the Marines distinct their identity norms values and perceptual lens To do this Johnson uses an innovative framework for analyzing strategic culture Next she traces the history of the Marines counterinsurgency experience from the expeditionary missions of the early twentieth century through the Vietnam War and finally to the Iraq War She shows that even a service as self aware and dedicated to innovation as the US Marine Corps is significantly constrained in the lessons learned process by its own internal predispositions Even when internal preferences can be changed ingrained biases endemic to the broader US military culture and American public

culture create barriers to learning **Globalisation Impacts** Amitendu Palit,2022-01-04 The book reviews globalisation by identifying causes behind the discontent it has produced in recent years It variously engages in economics political economy development and policy discourses to study experiences of countries and institutions in managing and adjusting to globalisation Extending the analysis to latest global developments including the remarkable advance of technology and digitalisation and political and economic upheavals caused by COVID19 the book collects varied academic perspectives and reflects on the present as well as future Comprising chapters written by distinguished academics and policy experts the book is a rare collection of cross disciplinary objective evaluations of globalisation *Thinking about Global Governance* Thomas G. Kiras,David J. Lonsdale,Ian Speller,Christopher Tuck,C. Dale Walton,2016-07-14 A fully revised and updated new edition of this leading introduction to the theory and conduct of warfare in the twentieth and twenty first centuries The book combines analysis of key concepts theory and military doctrine with reference to relevant examples from history and integrates the land sea and air environments *Alexander the Great: Lessons in Strategy* David J. Lonsdale,2007-12-10 This book offers a strategic analysis of one of the most outstanding military careers in history identifying the most pertinent strategic lessons from the campaigns of Alexander the Great David Lonsdale argues that since the core principles of strategy are eternal the study and analysis of historical examples have value to the modern theorist and practitioner Furthermore as strategy is so complex and challenging the remarkable career of Alexander provides the ideal opportunity to understand best practice in strategy as he achieved outstanding and continuous success across the spectrum of warfare in a variety of circumstances and environments This book presents the thirteen most pertinent lessons that can be learned from his campaigns dividing them into three categories grand strategy military operations and use of force Each of these categories provides lessons pertinent to the modern strategic environment Ultimately however the book argues that the dominant factor in his success was Alexander himself and that it was his own characteristics as a strategist that allowed him to overcome the complexities of strategy and achieve his expansive goals
